

9 best virtual reality apps for Android

The cost of VR headsets for Android is quite low, while the quality of VR applications is getting better and better.

Virtual reality (VR) is no longer a distant future. It has become a reality. VR applications may still be in its infancy, but the market is still very active, with Google, Facebook and Samsung developing their own platforms for mobile devices and PCs.

That's what makes Android a powerful platform for VR. The cost of VR headsets for Android is quite low, while the quality of VR applications is getting better and better.

Here is a list of the 9 best VR apps for Android today.

Top most amazing virtual reality app on Android device

1. Google Cardboard
2. YouTube VR
3. Google Daydream
4. Fulldive VR
5. InCell VR
6. Minos Starfighter VR
7. Netflix VR
8. VR Thrills: Roller Coaster 360
9. Expeditions

1. Google Cardboard

Cardboard is one of the two official VR applications for Android that Google provides. Google Cardboard is designed to help you install the correct headset Cardboard VR and gives you the opportunity to explore basic VR features. You can download applications that support Google Cardboard, load VR videos and watch 3D performances.

If you want to test the Cardboard VR app for Android, you will need to install this app.

Download Google Cardboard (Free).

2. YouTube VR

There is no introduction required for this app because you already know what YouTube is doing. Youtube's add-on VR for Android enhances the user experience, by introducing VR playback feature.

You use the same YouTube app, but installing YouTube VR allows you to switch to 'watch in VR' mode to enjoy your favorite movies on YouTube. YouTube VR is designed to work with all major VR headsets that support Android, but was originally created to be compatible with Cardboard and Google Daydream headsets.

Download YouTube VR (Free).

Google Daydream is Google's second official VR application. It is designed as a premium replacement for Cardboard. You'll need a phone that supports Daydream, as well as a Daydream View headset to use this app.

Daydream application acts as a portal for VR content that supports Daydream. You can find video VR, other Daydream support applications and configure to setup headset Daydream.

Download Google Daydream (Free).

4. Fulldive VR

If you're looking for a centralized VR platform that can give you everything, from web browsing to photo hosting, Fulldive VR is the app you need. Fulldive VR offers you its own VR store, containing hundreds of VR-capable applications, to install and operate through Fulldive VR portal. You can also take 360-degree photos and videos thanks to the app's VR camera.

You can also watch millions of YouTube videos available through this app as part of the VR experience or 360 3D. The application works with all Android-supported headsets, including Oculus, Daydream and Cardboard.

Download Fulldive VR (Available for free, in-app purchase feature).

5. InCell VR

Playing VR games is still a bit strange at this stage, but that's what makes InCell VR so special. InCell VR is an educational themed game for children who want to learn a little about the human body.

The player acts as a human guardian, from the 2100s, shrinking to fit the human body. The role of the player is to travel throughout the body to fight the influenza virus and learn some biological aspects of the human body while on the move. Play InCell VR very happy. The picture and sound part is amazing.

If you want to try this game without VR, you can switch to no VR mode by holding your finger on the screen.

Download InCell VR (Free).

6. Minos Starfighter VR

No virtual reality technology can be completed without a suitable future space to play. That's why Minos Starfighter VR appears.

Minos Starfighter VR has a visual spectacle that turns you into a space fighter pilot. Your mission is to fight alien enemies in various space environments. The quality of graphics and sound alone makes Minos Starfighter VR one of the best immersive VR Cardboard apps on the Play Store today.

Download Minos Starfighter VR (\$ 1).

7. Netflix VR

Netflix has supported VR for some time. Netflix VR is one of the first VR apps for Android. Netflix VR application for Android allows subscribers to view content through major VR headsets like Oculus, Daydream and Cardboard.

You have two views with this app. The first is a rustic experience and provides a static look for your media content. The second is an experience that immerses you in programs on TV or movies, by moving content to match eye movement.

Currently, there is no dedicated content for VR on Netflix, but you can view the entire Netflix catalog (without 3D). When VR becomes a more popular trend, we can expect Netflix to soon start adding more VR content to its product line.

Download Netflix VR (Free).

8. VR Thrills: Roller Coaster 360

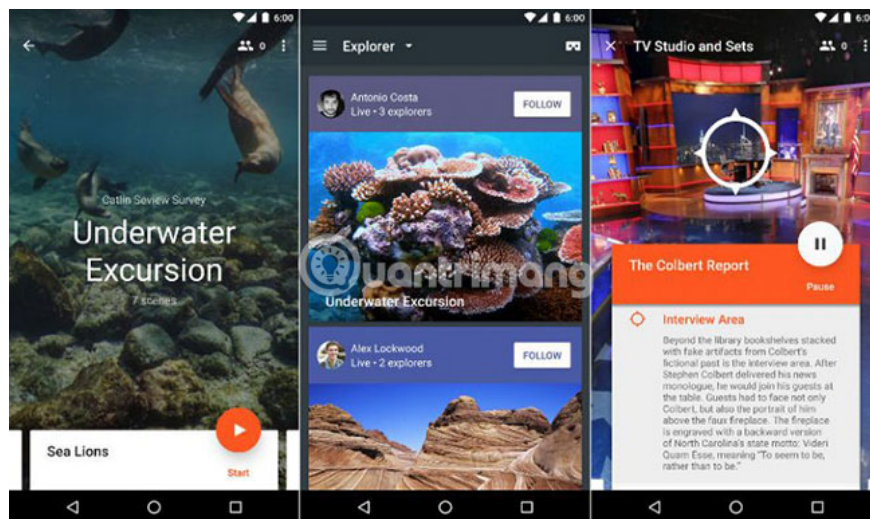

Why go out when you can experience thrilling games right in the house? This game, as you can expect right from its name, gives you the ultimate VR roller coaster experience. VR Thrills: Roller Coaster 360 is one of the best supported VR games in Play Store, with over 10 million installs.

You can experience real-life roller coasters, thanks to pre-recorded 360-degree videos or more basic 3D model roller coasters. The game is optimized for Google Cardboard headsets, but if you like, you can play games without a headset, using the touch control features on your phone.

Download VR Thrills: Roller Coaster 360 (Available for free, in-app purchases).

9. Expeditions

There is no better place to show the potential of virtual reality applications to put them in the hands of children. Thanks to Google's Expeditions application, that potential has been discovered. Students and educators can use Expeditions to explore virtually all places around the globe.

This application allows you to share similar trips with other headsets, so Expeditions are the perfect choice for small class groups. There are over 900 different tours to experience, from mountains to museums. Since Expeditions is a Google application, it is designed for Google Cardboard or Daydream headsets.

Download Expeditions (Free).

Google is leading the way with VR for mobile devices with platforms like Daydream and Cardboard. If you're looking to experience the best VR apps for Android right now, start with Cardboard and Daydream for the best mobile VR experience.

Although this technology is still in its infancy, VR is gradually becoming a trend. Get ready for what will appear next in the future. Surely you will be extremely surprised.
