

# 9 browsers replace Safari on iPhone

The Safari default browser on iPhone is stable and secure, but there are some limitations. If you're looking for a browser instead of Safari, try one of the browsers below.

The default Safari browser on iPhone is stable and secure, but there are some limitations such as an uninteresting user interface, limited cross-platform support, a lack of Dark mode on iPhone or a specialized dark theme, etc .

Now there are many attractive third-party browsers that can replace Safari. If you're looking for a browser instead of Safari, try one of the browsers below.

**Note:** Apple requires third-party developers to use the Webkit rendering engine, which means that the browsers on this list have similar performance.

## These web browsers replace Safari

1. Google Chrome
2. Mozilla Firefox
3. Opera Touch
4. Microsoft Edge
5. DuckDuckGo Privacy Browser
6. Firefox Focus
7. Opera Mini
8. Brave Browser
9. Aloha Browser

## 1. Google Chrome

1. Download Google Chrome for iPhone

Google Chrome is a cross-platform browser, capable of quickly syncing data between devices, performing good password management, and one-hand controls that make manipulating the browser faster.

## FEATURED

The downside of this browser is that it doesn't have an ad blocker. However, you can easily solve this problem with other alternatives. Smooth user interface and super useful features (voice search, automatic translation, etc.) built into the browser are also obviously used on the iPhone.

## **2. Mozilla Firefox**

### 1. Download Mozilla Firefox for iPhone

Firefox is another browser that also supports multi-platform, data synchronization between devices. This browser is developed by Mozilla, a leading organization when it comes to user privacy protection.

Firefox There are more features than Chrome, Firefox with a dark theme and integrated night mode, support for monitoring, good data management, etc., to enhance your browsing experience.

# Top 17 Firefox for iPad Keyboard Shortcuts to Surf Like a Pro

DILUM SENEVIRATHNE 03 May 2019

On the Apple iPad, Firefox is a phenomenal browser all around. It sports a terrific user interface, syncs data seamlessly among devices, and provides various useful features not present in other popular browsers (tracking protection, night mode, etc.). But most importantly, it's from a well-established organization that values privacy.

However, many people do not like to navigate on Firefox but this is just a personal preference so don't let this prevent you from using this great browser on iPhone.

1. The easiest way to speed up Firefox

### **3. Opera Touch**

1. Download Opera Touch for iPhone

Opera Touch is only one year old, but it has an outstanding feature that is one-handed use. You know that phones are getting bigger and bigger today, so the ability to surf on the one hand becomes the best point. The browser is designed completely from scratch for that purpose and the integrated Fast Action Button makes searching, switching between tabs and navigating the user interface easier.

## How to Add Hashtags on Pinterest

You can use hashtags on Pinterest to help you find content. Wondering how to do this? Read our detailed guide to learn about the work of adding hashtags.

Admittedly, Opera Touch lacks some features like bookmarks, password management. So if you want to use these features, you should choose a different browser such as Chrome or Firefox, but if you're only using simple web surfing, then this browser is the perfect choice.

## **4. Microsoft Edge**

### 1. Download Microsoft Edge for iPhone

Microsoft Edge is another heavyweight candidate for Safari's alternative browser position. It has a nice and sharp user interface, a complete dark theme, ad blocking support with the ability to whitelist sites and synchronize data with devices running Windows and Android-based.

# Firefox Focus vs DuckDuckGo: Which Is the Best Browser for Privacy

DILUM SENEVIRATHNE 04 Feb 2019

Search engines and advertising networks love to track and profile your online activities. All that in the garb of personalized search results and resulting in more targeted ads. But who knows for what other nefarious purposes is your data used?

That uncertainty is the reason why you need to

get serious about your privacy. Of course, browsers do offer the functionality to search in private mode. Sadly, they are more focused on

However, this feature does not support tabs, you can only browse the web on one page, help focus more. That's why this browser is called Firefox Focus.

## **7. Opera Mini**

### 1. Download Opera Mini for iPhone

Are you using low mobile bandwidth or living in a place with a poor Internet connection? That's when you should use Opera Mini browser. It was also developed from Opera Touch manufacturer but not a one-handed browser. This browser is integrated with Turbo and Mini modes.

So we need to photosynthesize

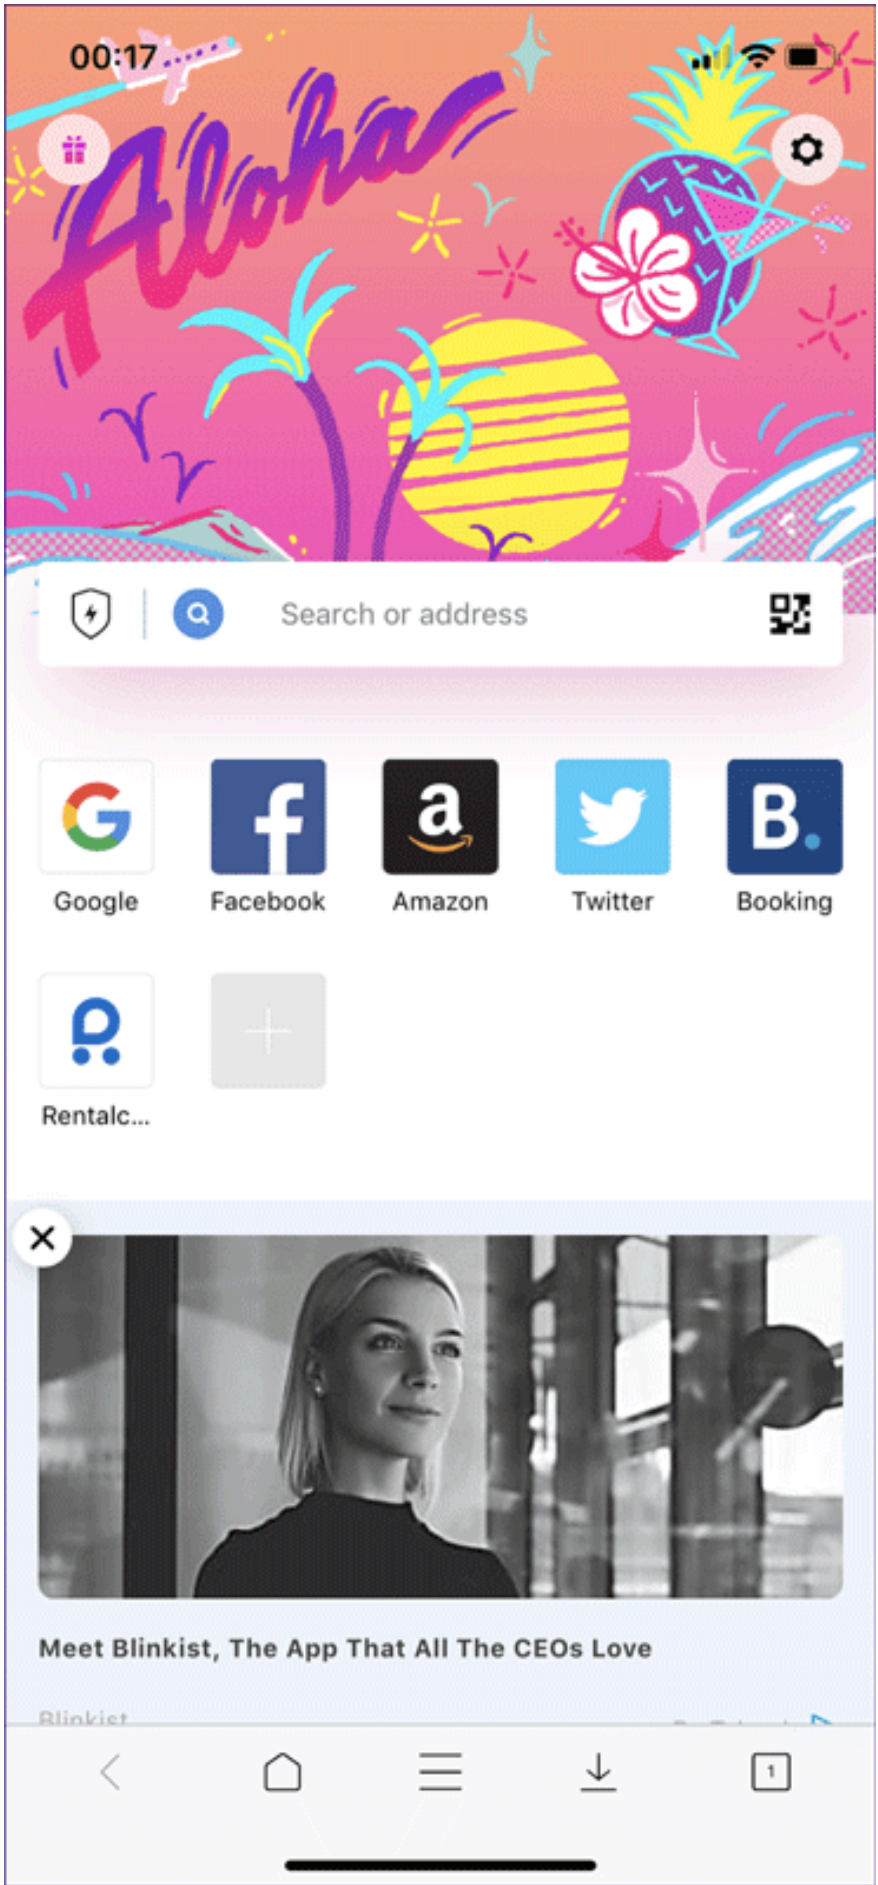

Blocking ads, forcing websites to load HTTPS versions or protecting you from browser fingerprints is too easy. You can also secure your browser from unauthorized access while offline using the biometric security feature on the iPhone.

Brave Browser has a feature to support good bookmark management, save login information and even synchronize browsing data between devices. This is a comprehensive web browser.

## **9. Aloha Browser**

### 1. Download Aloha Browser for iPhone

Aloha Browser provides a feature that other browsers on this list do not have support for integrated VPN. This browser will automatically connect you to the nearest VPN server to protect your privacy and access restricted content in your country and region.

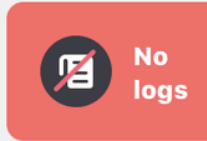

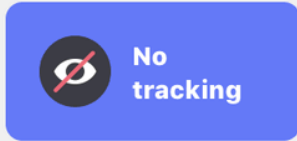

00:17

VPN

Already included:

Country

Fastest Server >

Auto Start ★

Enable to start VPN automatically when you are opening Aloha

Phone wide VPN ★

Enable to use VPN connection in other apps

Connect to VPN

However, you need to upgrade to the advanced version to be able to select the server you want to access. Basically free features are enough for users. The browser also has many other interesting features, such as ad blocking, background video playback and even download management.

Above are alternative web surfing options for Safari on the iPhone, if you want a lightweight web browser, choose Chrome, Opera Touch for hands-free web browsing and Firefox for security. So what are your goals and choices?
