There seems to be no easy task by removing clothes and washing with a washing machine, right? However, even this small job requires more sophistication than you think.

Therefore, we have produced a list of common errors that people often use when using washing machines and reduces the durability of clothes. Please refer to **9 common mistakes when using the washing machine and how to fix it** in this article!

1. Wash with hot water

Clothes will keep the shape and color better if washing at low temperatures. In addition, **warm water or cold water can also clean things like hot water** if you use a washing machine and a good detergent. Only items such as linen or linen (*woven from yarn of flax*) need hot water to be 80-90 degrees Celsius. All other items should

only be washed at lower temperatures. about 37 degrees C.

2. Wash the dirty stains with the machine

Stains that are difficult to clean should be **soaked and washed by hand or handle that stubborn stain before putting it in the machine** . Moreover, the stains when washing in the machine may not be clean but also wire to other items.

You can use **lemon juice** - a good cleanser - to remove sweat, a mixture of vinegar and soap that removes sap, or mix water with baking soda in a 3: 1 ratio to remove wine.

3. Add too much detergent or fabric softener

Giving too much detergent can interfere with the washing machine compartment and cause unpleasant odors, but if you give a lot of water to soften the fabric, it will make clothes longer dry. Please read the instructions for each recommended amount carefully and don't forget to follow the manufacturer's instructions. If your clothes or utensils are really dirty, use the pre-wash mode or double wash.

4. Use fabric softener for all types of clothing

Besides making the fabric look brighter, the linen fabric is softer and easier to tap, fabric softener also reduces the ability to absorb water through each washing. Therefore, it is better not to use it when washing **towels** , sportswear and items made from **synthetic fibers, spandex** .

5. Wash underwear with a washing machine

With automatic washing mode, the bra will quickly creep and lose shape, so it's best to wash it by hand. This rule also applies to lace pajamas and swimwear.

In contrast, nylon socks can be washed by machine if following some simple rules:

1. Use specialized washing water and use a separate laundry mode for thin items.
2. Wash with cool water, about 32 degrees at slow speed.
3. Put this in a special laundry bag
4. Flipped the map.

6. Use bleach with items made of elastane, lycra or spandex

Chloride bleaching will weaken the fabric, so do not abuse with any material. This is especially true for items made from materials such as **elastane, lycra, and spandex** because it will quickly lose elasticity if washed with detergent. Here are some tips to keep these items longer and more durable:

1. Only wash with cool water;
2. Do not use fabric softener;
3. Do not dry with automatic clothes dryer;
4. Is not.

7. Wash jeans too often

Jeans manufacturers recommend not washing with machines to keep colors longer. If you are afraid of washing by hand, you can still use it but you should not wash it too often, maybe every **2-6 months** , depending on how often you wear it and your own body odor. .

8. Dry the wrong way

Dry the wrong way also affects heavy clothes as much as washing the wrong way . Here are a few tips to help you avoid this error:

1. Do not dry automatically too often because it will quickly fade. Besides, do not dry thin and light fabrics.
2. **Do not dry or dry clothes too much**, making them harder to flatten.
3. Do not hang woolen clothes as this will make them dreadful. Put them on a towel and keep it in a wide, open place or use special hooks for these items.
4. Before hanging up the clothes, let it go to reduce wrinkles.

9. Do not clean the washing machine

After washing

Stains, detergent residues and many other things sticking inside the washing machine will sometimes stick to your clothes, causing odors and white streaks. To prevent this, follow the washing machine rules below:

1. Each time the washing is finished, open the washing machine lid for a while.
2. Remove all detergent residues from the detergent tray at the door after each use.
3. **Regularly clean the washing bucket .**
4. Do not run the machine every month with washing powder and vinegar once to kill bacteria.
