

# 9 useful Chrome extensions for ChatGPT

ChatGPT is super hot lately, allowing you to find information about just about anything out there. If you're a Chrome user, you'll be happy to know that there are many extensions that provide additional features for ChatGPT right in your browser.

Below is a list of Chrome extensions that allow you to use ChatGPT functionality in your browser. From AI-powered search results to writing bot-generated emails and copy, there's a lot you can do with these little tools. Let's find out more details through the article below!

## ChatGPT for Google

This Chrome extension for ChatGPT displays AI bot responses alongside search results on Google, Bing, Duckduckgo and others.

It works the same way you do any query in a search engine. For example, if you search for "how to bake a cake", this query will also be sent to ChatGPT so you have the same regular search results, as well as answers from ChatGPT. From there, you can choose which information you want to use.

You can access the extension from the extension pop-up window. Some other features include custom activation mode, highlight code and dark mode.

## Merlin

Merlin is a Chrome extension that allows you to use ChatGPT on any website you have opened or visited. Through a simple command, you can open Merlin on any website.

For example, if you're working with Google Sheets on Chrome and want to write a formula, press the keyboard shortcut **CMD + M** (Mac) or **Ctrl + M** (Windows) to activate Merlin and get help from ChatGPT.

There's also an option to use an extension to get GPT responses on any Google searches you'll do. From writing professional emails and summaries to coming up with math formulas, you can do anything with it.

## Tactiq

Tactiq turns your virtual meetings on Google Meet, MS Teams, Zoom and other tools into notes. Regardless of the type of call, Tactiq will perfectly transcript meeting notes.

With Tactiq, you can also create meeting summaries, add highlights, to-dos, agendas, and follow-up tasks. The meeting notes will be summarized on Google Docs.

Some of Tactiq's other features include meeting attendance tracking (Google Meet), screen capture functionality, live annotation (ZOOM), search of participant transcripts, and customization options. Choose to export transcripts to PDF and other transcript tools.

## **LINER**

LINER is a Google search assistant powered by OpenAI. It helps you find useful information through a Google search and helps curate content based on your highlights.

Not only the web, with LINER, but you can also highlight PDFs, images and even YouTube videos. Plus, it keeps track of your highlights and organizes them into categories and makes recommendations according to your reading material.

With this tool, you can get more accurate and high quality results from keywords. LINER also blocks pop-ups and other types of web ads from YouTube.

## **AIPRM for ChatGPT**

This is a Chrome extension that provides instant and accurate reminders for ChatGPT. There are thousands of reminders designed to help you get the best insights to improve your search performance and ranking.

While most of the prompts are related to SEO and SaaS, etc., you can also find reminders for other topics, like marketing, design, art, and programming. There are different types of reminders along with filtering and search options. Plus, you can export the entire conversation for future reference.

## **ChatGPT Writer**

ChatGPT Writer is a Chrome extension that helps you write emails and messages. This plugin helps you write more professional content on any platform.

You can use ChatGPT Writer to write social media posts, emails or even personal messages and access it without opening the website. The biggest advantage of ChatGPT Writer is that it supports all languages.

## **ChatGPT for Search Engines**

This extension works pretty much like ChatGPT for Google and shows results when you type a query in the search engine. However, unlike the other tool, you can access it as a pop-up window as well as a standalone website.

You can customize the activation settings and set up the Dark Mode theme. Plus, you can right-click on any text to send it as a reminder to ChatGPT.

# YouTube Summary with ChatGPT

If you don't have the patience to watch a long YouTube video, try YouTube Summary with ChatGTP, a tool that generates an accurate summary of the content in a YouTube video.

You can access the full transcript as well as the synopsis of any video by clicking the **Summary** button at the video thumbnail while browsing the video on YouTube.

## AI Content Detector

And last but not least, this tool is an AI content detector to check if an article, assignment or submitted content is machine generated.

Copyleaks is an AI-powered plagiarism detection engine that works with great accuracy in detecting bot-generated content via ChatGPT, GPT-3.5, GPT-3, GTP-2 and others . Plus, it can detect content written in English, French, Spanish, German, and many other languages.
