

9+ ways to take screenshots of ASUS computers for details

Summary of 9 quick ways to take screenshots of ASUS computers that you may not know. Refer to Huy Khang's article here immediately

Are you using an Asus laptop and want to take a screenshot of your computer screen but don't know how? Then don't miss this article from TipsMake! Because we will show you how to take screenshots of Asus computers in many extremely simple and easy-to-implement ways.

How to take screenshots of Asus laptops with key combinations

There are 3 key combinations you can use to take a screenshot of your computer as follows:

Key combination **Alt + Print Screen**

This is a key combination that helps you quickly take **screenshots of Asus laptop windows**. Just press the **Alt** and **Print Screen (PrtSc)** keys at the same time and the screen image has been captured and is saved in the personal laptop's temporary memory.

You just need to press **Ctrl + V** to paste the image in photo editors like Paint or Photoshop, then edit and save in the folder you want.

Key combination **Alt + Ctrl + S**

Using the key combination **Alt + Ctrl + S** is a popular **way to take screenshots of Asus Win 7 computers** because it allows you to move the mouse and capture the part of the screen you want without having to capture the entire screen. .

Specifically, after pressing the above 3 keys simultaneously, continue holding down the **Shift** key to drag the mouse to the end of the screen you want to capture. After taking a photo, the photo will be automatically saved in the default folder, Clipboard.

Windows + Print Screen key combination

With some other Asus laptop models, you must press the **Windows + Print Screen** key combination to successfully take a screenshot of the Asus computer.

If it still doesn't work, try pressing 3 keys **Windows + Fn + PrtSc** at the same time to take a screenshot to see if it works. Because some new versions of Asus have different commands integrated.

How to take screenshots of Asus laptops with keyboard shortcuts

Another faster way to cap Asus computer screens is to use keyboard shortcuts. Specifically, the way to do it is to press and hold the Windows key while pressing the volume down button. After performing the above operation, you will see the laptop screen dim quickly and then return to its original state.

That means the screen has been captured and the system automatically saves the screenshot to the default folder. Click on **Pictures** and then go to **Screenshots Folder** to view photos.

How to take screenshots of Asus laptops using software

In addition to the shortcuts that TipsMake just introduced above, you also have many other **ways to take screenshots of Asus computers** using software. As follows:

How to take screenshots of Asus with Snipping Tool software

How to take screenshots of Asus Vivobook using Snipping Tool software with the following specific operations:

Step 1: Open the Snipping Tool 's working window in the **Windows** section located in the lower left corner of the screen.

Step 2: There are 4 custom screen capture modes as shown below, choose the mode that best suits your purposes.

Picture 4 of 9+ ways to take screenshots of ASUS computers for details

Those 4 customizations have the following corresponding functions:

1. **Free – form Snip:** Take photos freely with custom shape and size (used most often because of convenience).
2. **Rectangular Snip :** Take photos with a rectangular photo frame.
3. **Window Snip:** Only capture open windows on the computer screen.
4. **Full – screen Snip:** Capture the entire display screen, in large size.

Step 3: Click the New button to take a screenshot of the Asus laptop.

Step 4: Press the key combination **Ctrl + S** to save the photo you just took in the folder you want and rename it appropriately.

With just the 4 basic steps above, you know **how to take screenshots of Asus laptops** to serve the process of manipulating the device.

How to take screenshots of Asus computers with Lightshot

With Lightshoot, the way to take screenshots of Asus Win 7 and Win 10 computers is the same with the following operations:

Step 1: Open the working screen of the window you want to take a photo of.

Step 2: Press the PrtSc SysRq key combination to activate the tool (you will see the screen go dark).

Step 3: Click and hold the mouse at the starting position and then move to the screen location you want to capture.

Zalo software

If you are using the Zalo application software on PC, do not ignore the screen capture support function by pressing the default key combination **Windows + Shift + S** as shown below.

Picture 8 of 9+ ways to take screenshots of ASUS computers for details

With the above **method of taking a screenshot of an Asus computer** , in just 2 seconds you have captured the screen of the conversation on Zalo PC. After that, you can choose to copy the image by pressing **Ctrl + C** or save the image to your computer by pressing the key combination **Ctrl + S**.

Use Camtasia software

Camtasia is software that has the function of recording video of the computer screen with open windows on the laptop. You cannot take screenshots with this software, but you can record screen videos and then export the videos as photos. Specifically, **how to take screenshots of Asus Vivobook laptops** with this software is done as follows:

Picture 9 of 9+ ways to take screenshots of ASUS computers for details

Step 1: Drag the slider to the timeline where the screenshot you want to take in the video appears.
