

## [CES 2020] ROG Zephyrus G14 - the world's most powerful 14-inch gaming laptop

Asus had an impressive new year launch with the introduction of CES 2020 'the most powerful 14-inch gaming laptop in the world': Asus ROG Zephyrus G14.

Asus had an impressive new year launch with the introduction of CES 2020 'the most powerful 14-inch gaming laptop in the world': Asus ROG Zephyrus G14.

ROG is a major gaming laptop brand on the market with products that own a strong, aggressive design. In recent times, however, the Taiwanese manufacturer has been paying more attention to the segment of small, compact, thin, and light gaming PCs - ROG Zephyrus G14 is one such product.

ROG Zephyrus G14 is claimed by Asus to be the most powerful 14-inch gaming laptop in the world right now, with the perfect combination of Ryzen 4000 CPU and Nvidia RTX2060 GPU, and a 2K resolution board, speed Refresh (refresh rate) up to 120Hz. All are 'packaged' in an alloy chassis only 17.9mm thin and 1.6kg light. The processing power and portability of ROG Zephyrus G14 is indisputable.

It's no coincidence Asus has chosen to equip Ryzen 4000 and RTX2060 on ROG Zephyrus G14. Ryzen 4000 is an AMD-customized CPU version that optimizes cooling efficiency according to performance levels, suitable for installation in a compact compartment. The chip is manufactured using AMD's latest 7nm process, and has up to 8 cores and 16 threads, promising great processing power, especially for gaming, livestreaming and linking. Export 3D graphics. While the RTX 2060 is also a gaming CPU series that has confirmed its capacity from the

time of launch.

With 32GB of high-speed DDR4-3200MHz RAM running in Dual Channel, up to 1TB of NVMe SSD storage, multitasking capability and application launch speed are the factors that will ensure ROG Zephyrus G14

Like other high-end ROG models, Zephyrus G14 will also be equipped with an AniMe Matrix LED display option with over a thousand mini LED light bulbs on the lid to personalize, allowing users to display custom graphics, animations as well as other effects.

ROG Zephyrus G14 hardware configuration:

1. CPU: AMD Ryzen 7 4800HS
2. GPU: NVIDIA GeForce RTX 2060
3. RAM: 32GB of DDR4-3200MHz
4. ROM: 1TB SSD M.2 NVMe PCIE 3.0
5. Screen: 14 inch, 2K, PANTONE Validated with Adaptive Sync
6. Wireless connection: Intel Wi-Fi 6 (802.11ax); Bluetooth 5.0 (may change when operating system upgrade)
