Good water purifier is not a question of many consumers today. The following article about pure water filter reviews will help you to answer this question. Please consult and make your own decision!

Good water purifier is not a question of many consumers today. The following article about **pure water filter reviews** will help you to answer this question. Please consult and make your own decision!

What is the Pureit water purifier?

When it comes to Unilever, surely you will be very familiar, this is a multinational corporation that is famous for countless consumer products such as washing powder, dishwashing liquid, shampoo, shower gel . And Pureit water purifier is a product derived from this group.

Unilever is headquartered all over the world, the company that produces the Pureit water purifier is headquartered and assembled in India.

According to many surveys, Unilever's Pureit water purifier is the best-selling water purifier in the world. So is it really as good as the ads? Below will be their salient features.

Is Unilever's Pureit water purifier good?

About design style

Unilever's Pureit water purifier has a compact design. With a capacity of about 9 liters, this machine will be suitable for families with few people or families who do not have too many needs to use filtered water.

The details of even the smallest machine are also meticulously cared to create the overall luxurious and modern machine. The outer shell is made from transparent plastic, which adds a touch of sophistication. In particular, the machine is easy to disassemble, bringing convenience for cleaning.

About the ability to filter water

Pureit water purifier applies Nano filtration technology, capable of removing impurities, mud, nano-sized bacteria thanks to the following 5 filtration steps:

1. Step 1: The sediment filter has the ability to remove medium and large impurities, mud that can be observed with the naked eye.
2. Step 2: Germicidal filter, when going through this filter the bacteria will be retained
3. Step 3: Micro-fiber filter is made up of micro-fibers that retain heavy metals such as iron .
4. Step 4: Activated carbon filter has the ability to remove parasites, pesticides, chemicals . as well as strange odors in the water.
5. Step 5: Membrane microfiltration, where water will once again get rid of bacteria as well as harmful agents in the water.

Thanks to the above 5 advanced filtration steps, when using Pureit water purifier, the output water is always guaranteed to be clean of pure bacteria, ensuring natural sweetness.

Its water purifier products have been certified by the US Environmental Protection Agency and more than 35 other international organizations to kill bacteria, retain minerals good for the body.

Smart feature

Pureit water purifier is equipped with warning function of the bactericidal expiry date brings many benefits to the process of use. Accordingly, there will be 3 levels of alert including: Safety, preparation and replacement. When the light is white or there is only a small fraction of red, the disinfectant is still in a safe area to use. When red accounts for two-thirds, you should pay close attention to the replacement time. The red color is 100% when you need to replace it immediately, and the water supply system of the device is stopped to ensure your family does not have to use contaminated water.

Power saving ability

This device works entirely on the principle of common chemistry and physics, so they do not need to use electricity so that users can save a relatively monthly cost. At the same time this feature is also very environmentally friendly, limiting the possibility of short-circuiting .

Should I use Unilever Pureit water purifier?

From the above objective reviews, it can be seen that Pureit water purifier is quite modern and advanced. With a price of 1.2 to 10 million VND, you can choose the device that is suitable for your pocket, bring pure water, remove bacteria, viruses, heavy metals and unpleasant odors. .and also help save the cost of electricity, money to buy filtered water monthly.

Note when using the Pureit water purifier

1. You should only use water sources that meet drinking water standards to put into the machine. Polluted water, or hard water, will make the machine inefficient, affecting the quality and durability of the filter elements.
2. Always take care to replace the sterilizer on time as the warning given
3. Clean, replace the filter cartridge periodically
