What should be noted when choosing to buy cheap pesticide sprayers?

1. Currently, there are many different types of pesticide sprayers on the market such as: traditional hand-drawn sprayers, gasoline-powered sprayers, electric pesticide sprayers . Users need to base on the item Purpose and conditions of use to select the appropriate type of bottle, avoid unnecessary waste. For example, if you do not use regularly, and only spray for small areas, just use a hand sprayer. If a large area requires a high frequency of spraying, you should choose a gasoline or electric sprayer.
2. Select the appropriate container capacity. When determining the purpose, you can also choose a capacity option when choosing a pesticide sprayer. In addition, the size and capacity of the tank should be appropriate to the characteristics of the user, avoiding the choice of a too large vase, a large capacity will cause waste.
3. Choice of machine brands: Brands are also quite important, determining the quality and durability of cheap pesticide spraying machines. Some suggestions for you are: Oshima, Honda, Bgas . these are well-known names, widely chosen by consumers.

Note when using cheap pesticides

1. Before operating the machine, you should check the fuel and make sure the fuel is properly mixed.
2. While starting the machine, do we need to check if the valve to be sprayed is locked? To avoid chemicals being sprayed out during start-up.
3. Chemical tanks should be filled with clean water or liquid chemicals and should not be run when the chemical tank is empty.
4. Do not spray back the wind direction and keep the angle of lifting about 15 degrees
5. Wear protective clothing during use.
6. Spraying should be done in the early morning or late afternoon.
7. After starting, you should keep the machine running for 3-5 minutes at low speed.
8. After finishing using, you need to clean the bottle, the machine, the wind, the air filter, . to avoid oil, rusty machine.
9. Clean all sprayers, cover the machine so that it is not dusty and dirty, and store it in a dry place.

Some of the most widely used cheap pesticide models today
