From the general article of how to download YouTube videos to the computer the fastest, TipsMake.com has tested and come to the conclusion: on the computer, we should use the following 3 ways to download videos and movies from YouTube.

1. See more articles about 5 ways to download YouTube videos quickly.

1. Use IDM to accelerate downloads:

This is probably the first choice for us today, although Internet Download Manager is a paid software, but users still have up to 30 days to experience the features of this great file download application. The installation is very simple, you just need to **Next> Next> Finish** . Once installed, open the browser, go to YouTube, you will see **Download this Video** button of IDM located above the right corner of the video as shown below:

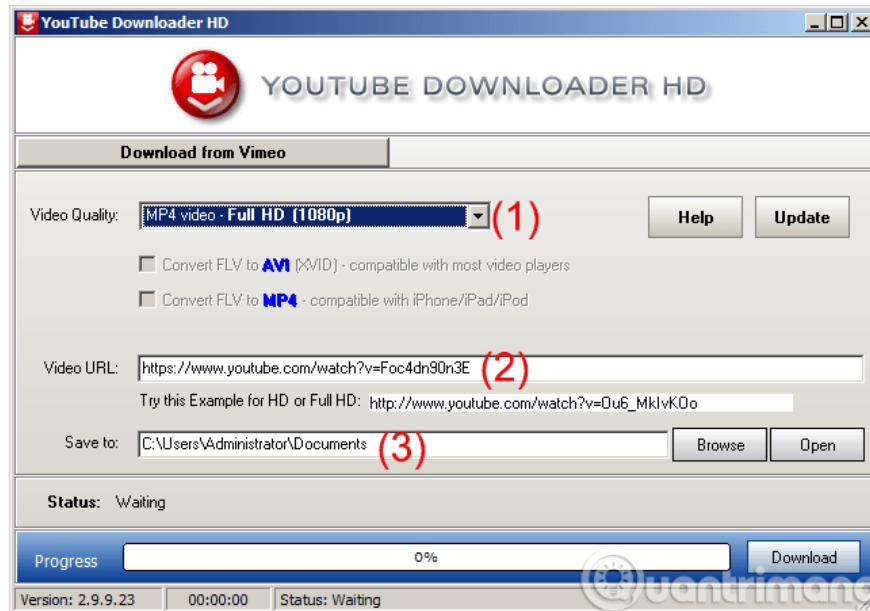

1. If in case IDM does not automatically download the link, how to do it?

2. Use Youtube Downloader HD:

This is great software, besides **YTD Video Downloader** (this must be installed, and has ads). And YouTube Downloader HD has an installation, and **Portable**, you just need to download the computer, extract and run the file.

1. Download YouTube Downloader HD here

All we need to do:

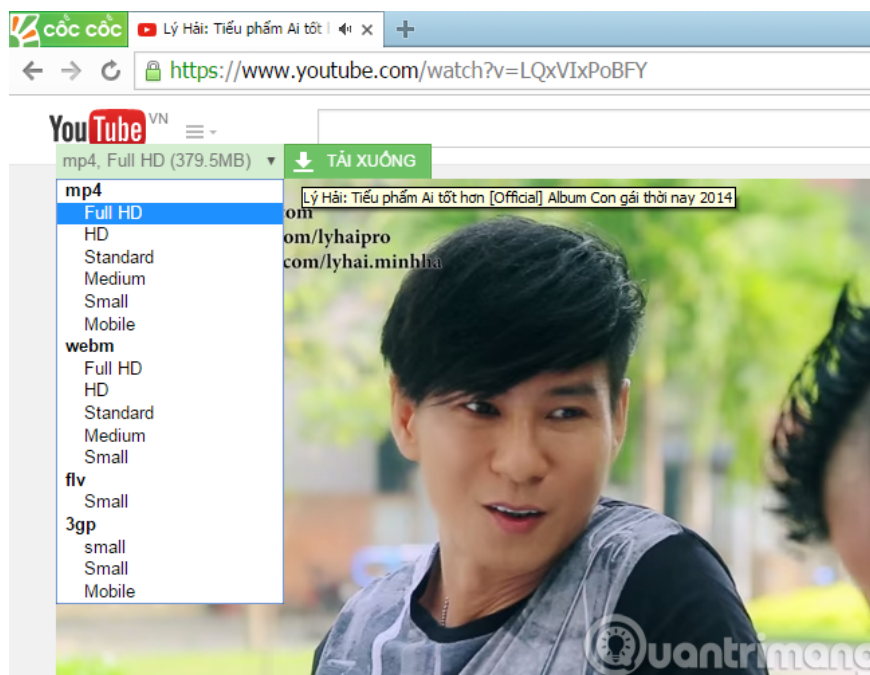

1. 1: select file format, usually - 480p or HD - 720p or higher.
2. 2: copy paste the URL and URL of the YouTube video here.
3. 3: select the path to save video file on your computer.
4. Click the Download button. Accomplished!

3. Use Coc Coc browser:

1. Download Coc Coc latest version

Developed based on the main platform Chromium, Coc Coc browser has quickly won the hearts of users in Vietnam with the main features such as:

1. Support typing Vietnamese.
2. On Facebook, websites are blocked quickly.
3. There is a utility to accelerate file downloads.
4. Download simple YouTube videos.

Just install Coc Coc on your computer, when you open the YouTube video, you'll see the Download button on the top left corner of the video, besides the YouTube video format option when downloading (there are many formats, Suitable for different types of screen sizes and resolutions).

Hopefully the suggestions above will help you quickly solve the problem when you want to download YouTube videos to your computer. *Good luck!*
