Filmed with Camtasia Studio

If you select the "**Record the screen**" button , a rectangular window will appear at the bottom of the screen. At this point, you need to pay attention to the following points.

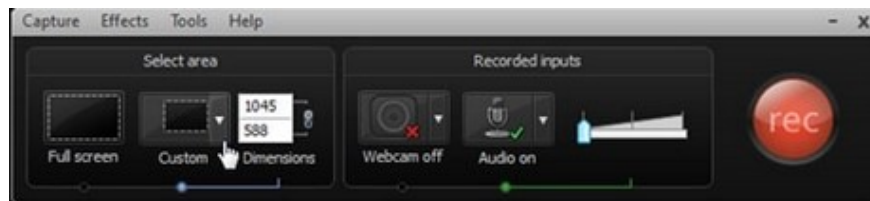

Full screen : Record the entire screen

Custom : Choose your desired screen size; for example, here I've selected 1045 x 588.

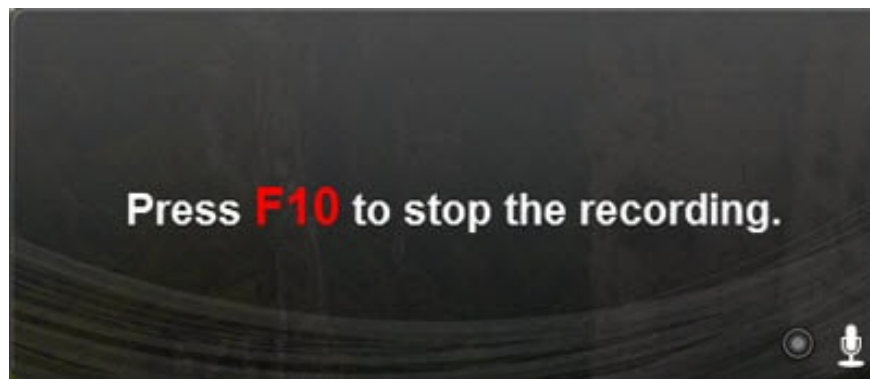

Webcam: ON or OFF

Audio : ON or OFF

Next, press the **REC** or **F9** button to start recording.

After you have finished recording, press **F10** to end.

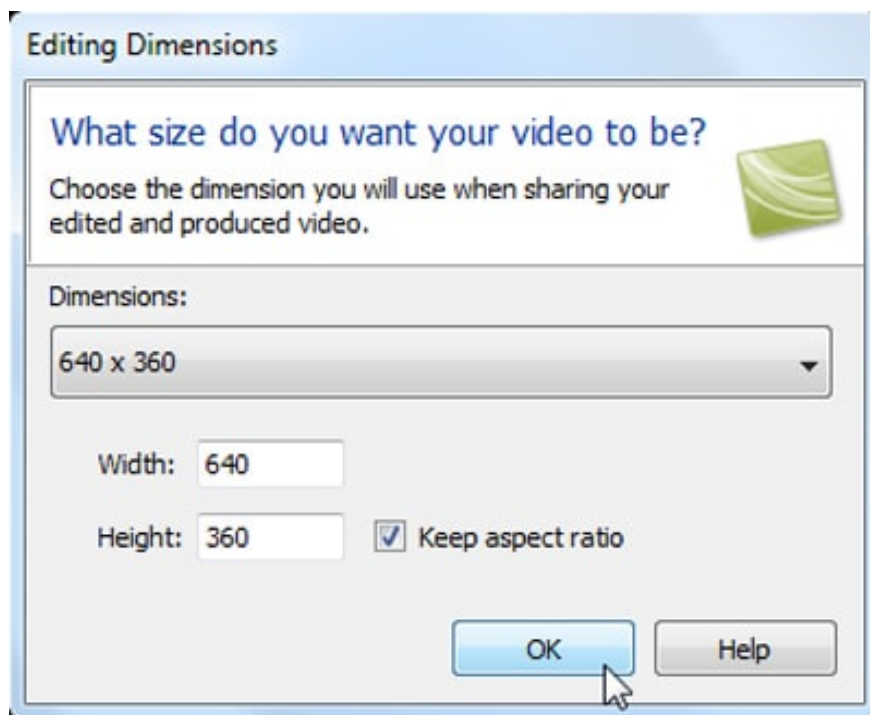

If you are satisfied with the result, click the **Save and Edit** button to save and make the necessary changes.

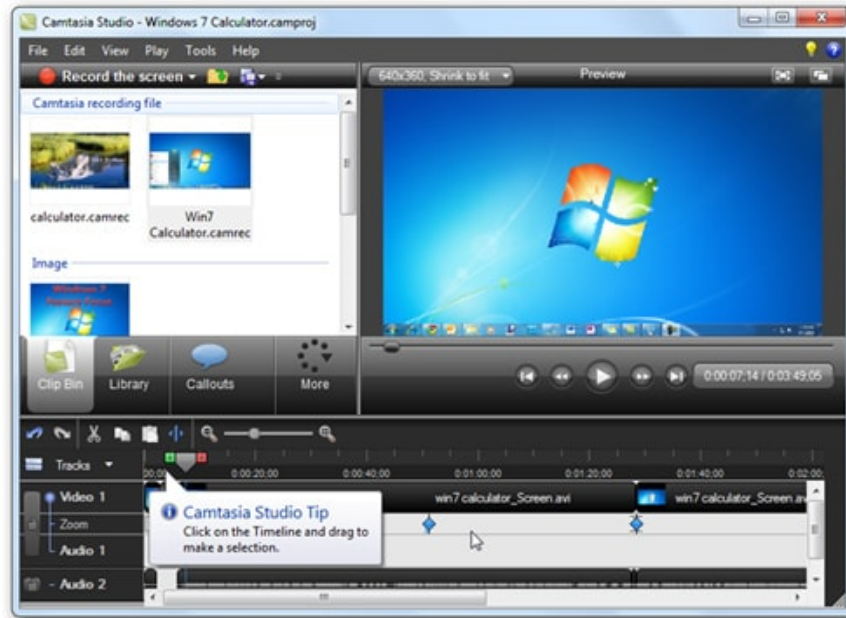

Edit with Camtasia Studio

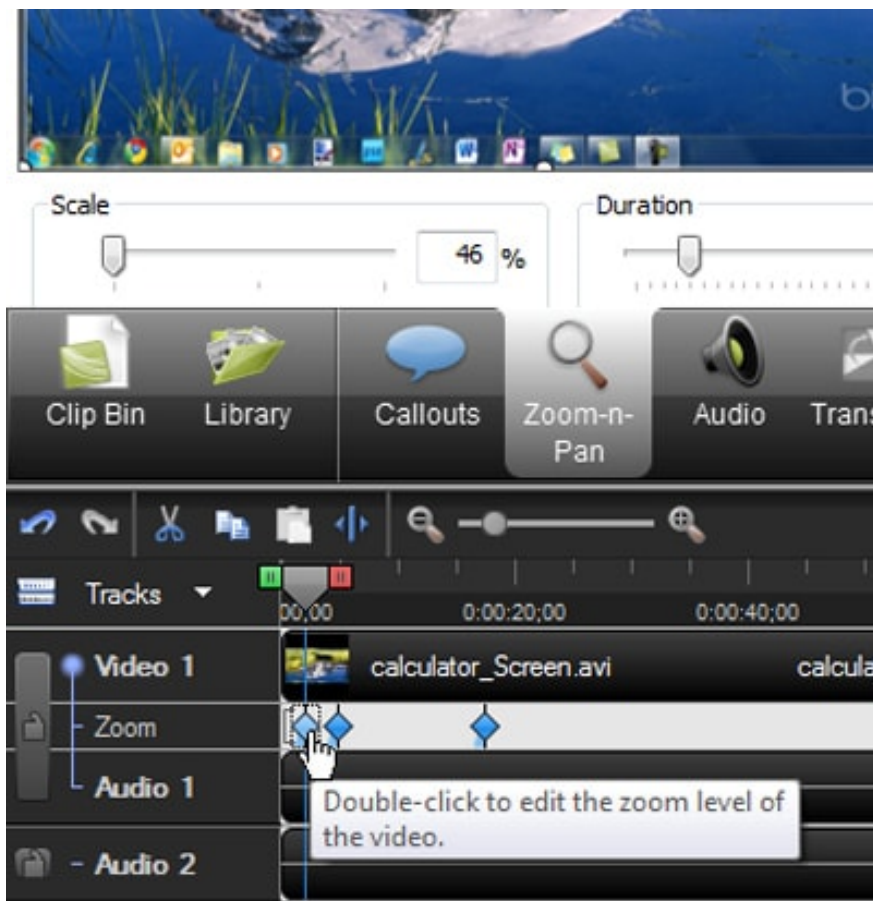

The editing process will begin with the option to select the video size.

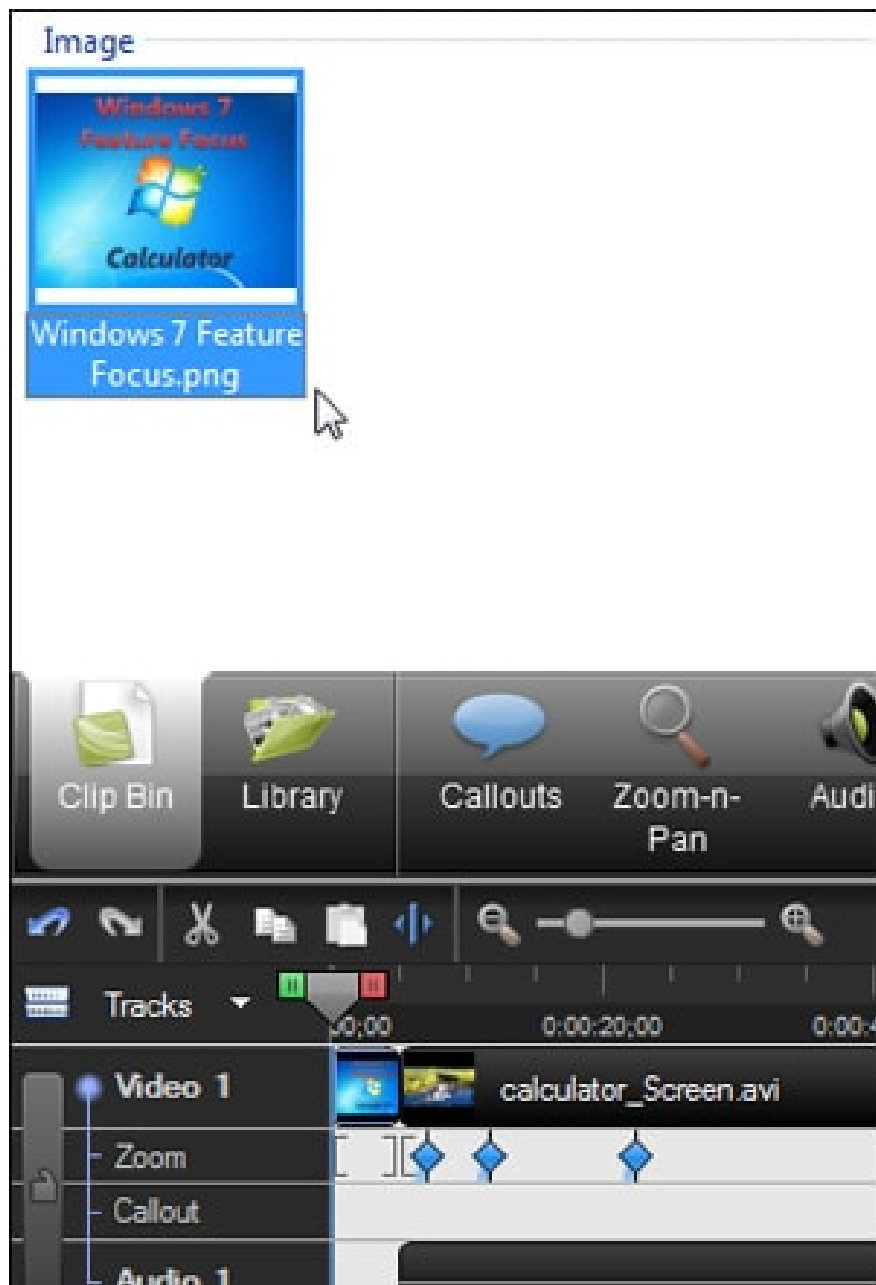

The official editing interface will look like this.

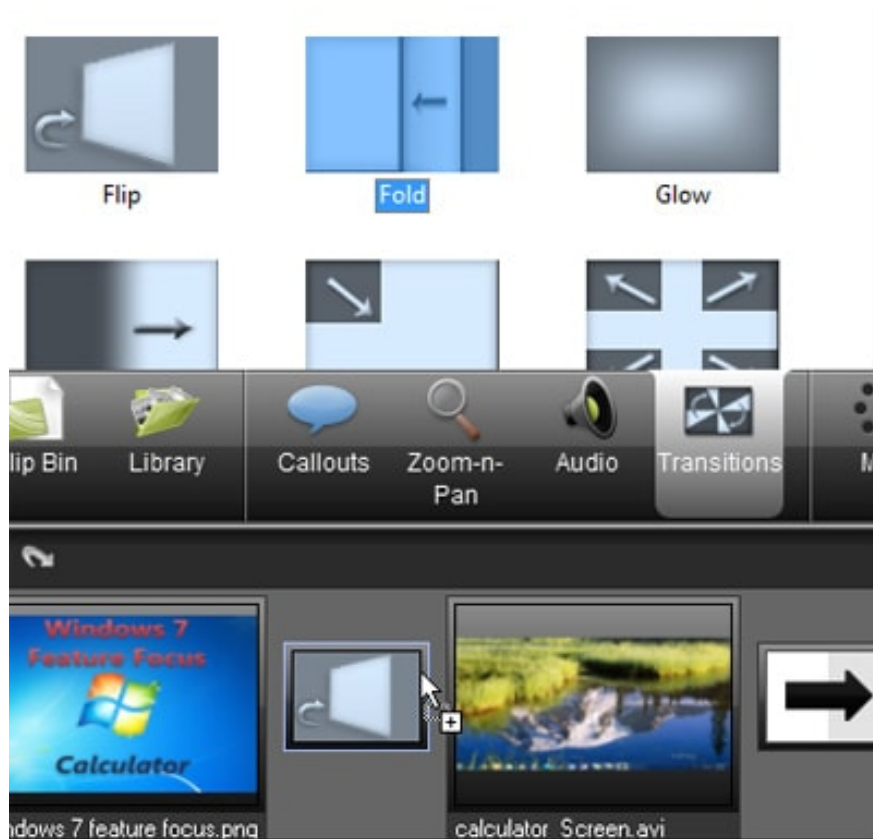

The Zoom mode is used to zoom in or out of the video.

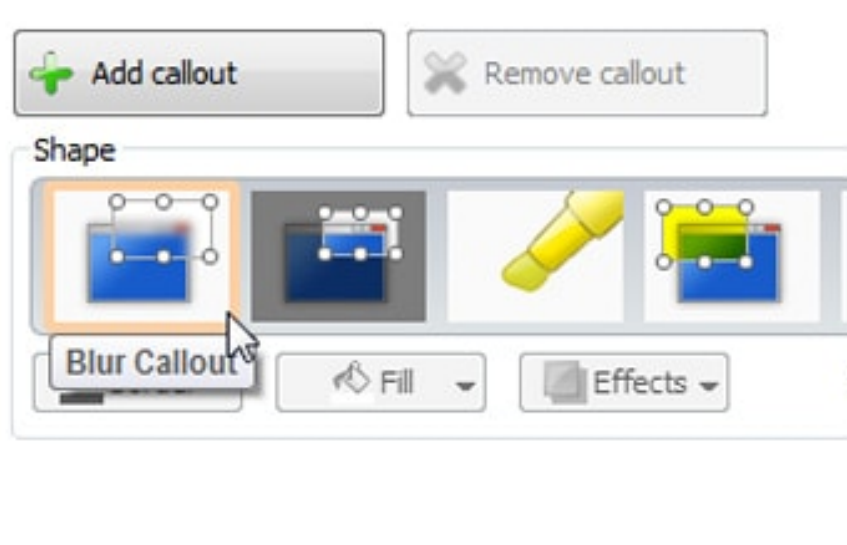

You can add photos or background music to further illustrate the video.

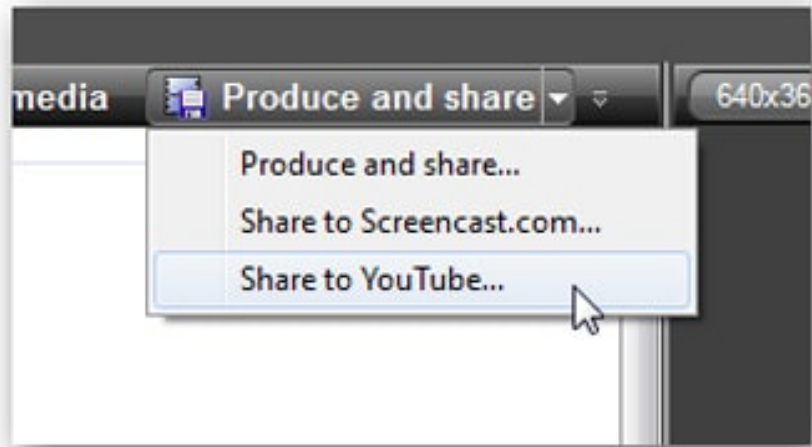

The effects are built into the video.
