

A new series of Toshiba laptops has been launched

After announcing the first laptop after 7 years of using AMD processors, Toshiba continues to stir up the world computer market by launching a new range of products as well as upgraded versions of older products.

After announcing the first laptop after 7 years of using AMD processors, Toshiba continues to stir up the world computer market by launching a new range of products as well as upgraded versions of older products.

First to mention the new gaming laptop series Satellite X205, with two models S9349 and S9359. Both new laptops are equipped with a powerful nVidia GeForce 8700M GS graphics card, supporting 3D graphics applications, essential for game browsers. Previously, only Dell computers used the nVidia mobile game card. But now, Toshiba Satellite X205 will also have the next generation Geforce Go 7950GTX nVidia card, now considered the best 3D card today.

The prices of S9349 and S9359 models are 1,999 and 2,499 USD respectively. The S9359 is more expensive due to an additional TV tuner ATSC captures HD signals, higher screen resolution, and a larger capacity hard drive.

At the same time, the two new models also own HD DVD drives, becoming the fourth and fifth Toshiba laptop with HD DVD drives, a number that could make rival Sony with its Blu-ray drive laptops great. sweat.

Not to stop, Toshiba continues to launch the Satellite U305 laptop with three models of S5097, S5107 and S5127. For customers targeted at students and owners of small businesses, 13.3-inch laptops weigh only about 2.1 kg. All three models are equipped with Intel's Core 2 Duo processor, a multi-format DVD drive that supports reading and writing to 11 CD and DVD formats. The price of this product line will range from 900 to 1,400 USD and will be available in the market in the third quarter.

Not only launching new products, Toshiba also offers upgraded versions of products already on the market. Three upgraded models of the Qosmio F45 series appear this time with a new name, when they have two more AV letters. Those are Qosmio F45-AV410, AV411 and AV413.

These are Toshiba's entertainment laptops, equipped with a 15.4-inch widescreen display with 1,280 x 800 pixel resolution, Dolby Home Theater technology, Wi-Fi connectivity over 802.11n networks, and a multi-purpose DVD drive. format, and a piano white frame. They also have a 1 GB flash memory thanks to Intel Turbo Memory technology, which significantly reduces startup time and running applications. Selling prices of AV410, AV411 and AV413 are 1,300, 1,350 and 1,400 USD respectively.

The Satellite P205 also has an upgraded version of P205-S6347 with many new features that are superior to the old models. This upgrade has been integrated with Toshiba HD DVD drive and new processor application with higher speed. The Satellite P205-S6347 has a 1.66 GHz Core 2 Duo processor, 2 GB RAM, 200 GB hard drive, and a 17-inch screen with 1,400 x 900 pixel resolution. Estimated retail price of the product is USD 1,450.
