In order to have a laptop (laptop) that fully and completely meets the needs of users, besides the computer (of course), the accompanying accessories are becoming more and more important in extend life as well as fully exploit the features of the machine. Along with that, they also make owners become more professional and outstanding.

Here are the most appreciated accessories that are most needed for anyone who is always working . mobile with an HP-branded laptop.

"Comfort" with Docking station

In addition to keyboards and mice, the job certainly requires users to connect their laptops to some other peripherals, such as printers. However, every time you bring your laptop, the user is quite strenuous when it comes to pulling the plugs out.

Docking station

Or simply, users can choose for themselves a Docking station. It can turn the laptop into a fully-equipped desktop computer with the ability to replicate communication ports in a space-saving design. It allows laptops to

connect to peripheral devices such as monitors, printers, keyboards, mice .

Users only need to connect peripheral devices to Docking station and then connect to the laptop. When you have to take your laptop away, just lift it from the device to expand the port, instead of having to remove all peripheral devices. Currently, users can be satisfied with the latest *HP Docking Station AY052AA* with a reference price of VND 2,000,000.

USB Media Port: Missing is really regretful!

At first, when it comes to this device, there will surely be many people claim that it is redundant when in each laptop now has at least 2-4 USB ports integrated. But use it before you know it. It is like why speakers need to have a headset.

USB Media Port

And a *HP USB Media Port product that supports 4 USB ports* Connecting an external device to a laptop via a single USB connection will be hard to ignore. It helps to connect external speakers, headsets, and microphones and extend the throughput network higher than wireless via the 10/100 Ethernet port. In particular it receives videos via USB with resolutions up to 1920 x 1080.

HP USB Media Port includes *VY843AA, VY845AA, VY847AA models* with reference prices of VND 1,800,000, VND 2,600,000 and VND 3,400,000 are suggestions suitable for most users because it can be compatible with any Laptop period with USB 2.0 port available.

Power adapter Slim adapter

Using an external power source plugging directly into the laptop will likely cause a fire and explosion hazard. Because the external power supply is often unstable. If the power is unexpectedly lost, the user will lose data before saving it, sometimes it is important data.

With HP's Slim Adapter power supply, users can feel the flexibility and convenience of an AC adapter. And when traveling, outside the office, users do not need to carry a full bag of the charger as fast as before.

Power adapter Slim adapter

Slim adapter allows charging the battery whether the computer is on or off, when plugged into the power source. With Smart-battery technology, it optimizes power consumption thanks to its energy saving capability and helps the computer run cooler.

There are two models for users to choose easily: 65W slim adapter AX727AA and 90W slim adapter BT796AA, compatible with series: *HP Envy, HP G Series, HP Pavilion, Compaq Presario* .

Extended battery: The rescue is difficult to lack

For a mobile person, often carrying notebooks, in addition to the weight of the device, the battery life is always one of the very important factors.

Currently, HP Long Life Battery (Extended Life Battery & HP Life) battery solutions help you improve the quality of work as well as life. Types of HP batteries allow to extend battery life twice and extend battery life up to 6 hours. An advantage not to be added to this solution is the HP Fast Charge technology, which fully charges the battery up to 90% in just 90 minutes.

HP extended battery.

In addition, in the process of using it, to extend battery life, you should pay attention and 'handle' the most battery- *hungry* elements of your laptop such as screen brightness, Wi-Fi connections, PCMCIA card type, peripheral devices .
