Acer Extensa 4630 has a simple design and faithful to the typical design of Acer. The case is dark gray, accentuating the Acer logo as a highlight. Although the design is not as impressive as other products, it still attracts users thanks to the characteristic color of Acer. Weight of 2.4 kg including 6-cell battery is not too heavy for Vietnamese users.

The connection ports are arranged on both sides of the body quite reasonably and richly. The DVD-RW Multi Recorder drive on the side, the other connection ports are concentrated on the left, arranged logically to help users feel comfortable in use. In particular, the most notable is the HDMI interface that supports the entertainment system. Acer EasyPort IV allows connection between Acer laptop computers. The front of the Extensa 4630 is the audio connection port, turning on and off the wireless connection and LED status notification. Radiator slots are arranged in the back so you don't have to worry about the uncomfortable feeling

of the machine's exit temperature when using the mouse.

14.1 "WXGA LCD display with 1,280 x 800 pixel resolution uses CrystalBrite technology so images display crisp, bright and true colors, a characteristic curved keyboard, full size, feels sympathetic In addition, the speaker system is located above the keyboard and CrystalEye webcam and an integrated microphone support online meetings via the Internet.

Above the keyboard is a series of quick-press keys, which instantly manipulate the device's features. The touchpad is wide and quite responsive.
