

Acer adds a new color to the Chromebook C720P

Before the upcoming CES 2014 event, Acer said it will expand the Chromebook C720P laptop to add a new version.

Before the upcoming CES 2014 event, Acer said it will expand the Chromebook C720P laptop to add a new version.

Chromebook C720P-2600 with beautiful white design

According to *CNET* on Thursday, Acer said the new model extended an option codenamed C720P-2600, with a luxurious white design. Previous C720P version was only black.

In terms of configuration, the Acer C720P-2600 still uses an 11.6-inch touch screen that achieves a resolution of 1,366 x 768 pixels (*HD standard*), Intel Celeron 2955U processor (*based on Haswell architecture*), 2GB RAM, drive 32 GB SSD. The battery life of the device is about 7.5 hours. The selling price is US \$ 299.

When buying the device, users are also given a 100 GB storage account at Google Drive service within 2 years. This version will be sold in January.

Reportedly, *Chrome OS* is an operating system built from the *Chromium* open source platform based on web and cloud computing.
