

Acer AS4738, card game lowered by Acer in 2010

Aspire 4738 is new with 3 new colors including red, brown and black in which the AS4738 i3-380 uses hard drives up to 500GB.

Aspire 4738 is new with 3 new colors including red, brown and black in which the AS4738 i3-380 uses hard drives up to 500GB.

To improve battery life, AS4738 was introduced by Acer engineers in Led Backlit display technology. This technology uses LED bulbs behind the screen to create images, sharper and reduce power consumption by 15% compared to conventional CCFL (fluorescent) technology. The AS4738 is equipped with an HDMI / VGA port for connecting to TVs and projectors, combining technology to simulate 3rd generation Dolby surround sound for headphones.

Three fresh colors of AS4738 core i3-380.

According to Acer Vietnam, this AS4738 series is in the mid-range segment with the retail price at this time of VND 12,099,000. Although the design is not really "super thin" but not so that AS4738 loses the sophistication in each design line. The machine has a scratch-resistant and scratch-resistant crust that is used by super-fine mesh plastic compound, plastic cover that covers the bottom of a single-piece machine, creating certainty, reducing heat for the bottom of the machine and improving the ability Water resistant in case of contact surface spilled.

AS4738 is improved with the core i3-380 hyperthreading processor clocked at 2.53GHz.

AS4738 uses Signal up technology to improve the Wi-Fi reception capability by 30%. This is one of Acer's proprietary technologies. Surrounding the screen protector, is an antenna that runs vertically and connects to the Wi-Fi card inserted on the Main panel, when opening the screen, the antenna is like a mini Parabol pan, significantly reducing the restrictions. terrain and distance when Wi-Fi reception.

Another strong point is that it runs smoothly as the Core i3-380 processor (3MB L3 cache 2.53GHz, DDR3 1066MHz, 35W) speeds up to 2.53GHz. With this hyper-threading chip, the multitasking speed of applications is faster and more powerful than the "predecessor" versions.
