

Acer introduces a gaming monitor equipped with an IPS panel with a 240Hz refresh rate and 0.5ms response time

Acer Vietnam introduces two new Predator XB253QGX and Nitro VG252QX displays in its gaming ecosystem, and is the first two monitors in Vietnam to be equipped with an IPS panel with a scanning frequency of up to 240Hz, response time The fastest response 0.5ms GtG.

Possessing an IPS panel with super-fast refresh rate, incredible response time, and gamers-designed design, both of these new Acer monitors will help gamers get a professional gaming experience.

Predator XB253QGX

"By equipping the Predator XB253QGX and Nitro VG252QX with the latest technologies in the world, Acer pioneered to deliver great products specifically for its customers," said Ms. Luong Thu Quyen, Product Development Manager, Acer Vietnam, said. "With these equipment, gamers with plenty of finance will be able to fully enjoy top-notch AAA games today as smoothly as possible."

One of the first screens in Vietnam is equipped with a 240Hz IPS panel

Predator XB253QGX and Nitro VG252QX are two 25-inch monitors with Full HD resolution, equipped with a 240Hz refresh rate and the fastest response time of 0.5ms GtG on IPS panels. With this equipment, the duo will completely eliminate ghosting and frame tearing during the game while ensuring eye-catching, accurate colors from all angles. In the past, high-frequency monitors were usually equipped with TN panels only.

Nitro VG252QX

NVIDIA-certified G-Sync (G-Sync Compatible), Predator XB253QGX and Nitro VG252QX displays are capable of synchronizing the scan frequency with the graphics card for a smoother experience than ever before. All this technology creates a great game machine when gamers have to embark on fierce battles on CS: GO or PUBG.

Advanced design and configuration in the segment

Born for gamers, Predator XB253QGX and Nitro VG252QX all have a bold gaming design. The stand of this couple has a V-shaped style that gives players extreme inspiration in intense battles. Hardcore gamers can choose the Predator XB253QGX if they want a cool and cool, Predator-like display for their gaming corner. For this screen, users can also customize the height, rotate and fold in multi-direction, as well as built-in convenient USB 3.0 port suitable for the design.

Predator XB253QGX can adjust angles as you like

Both monitors ensure color accuracy with the ability to display 99% of the sRGB color range and VESA Display HDR400, 400 nits of brightness twice that of normal products, resulting in colorful frames. but still accurate, suitable for use as a gaming monitor as well as specializing in graphic work.

Technologies reserved for gamers are indispensable on Acer gaming monitors. Predator XB253QGX and Nitro VG252QX are equipped with 3 GameView display modes corresponding to each type of game, including: action, racing, sports. Black Boost technology with 11 levels of lighting adjustment helps gamers gain an advantage in the "difficult" stages. Acer Display Widget software helps users to install and adjust initially easily.

The duo also possesses vision protection technologies such as BlueLight Shield technology that reduces 80% of the blue light emitted, flicker reduction technology and anti-glare technology to soothe users' eyes when used in time. long time.

Two monitors Predator XB253QGX and Nitro VG252QX have retail prices of VND 11,500,000 and VND 9,000,000 respectively in Vietnam market. Accompanying is the 3S1 Warranty service for Acer's premium products: quick warranty, within 3 days including Saturday and Sunday, more than 3 days for new or equivalent product replacement for customers.

From April 1, when ordering new Nitro VG2520X monitors at Acer product dealers nationwide, customers will receive gift packages worth VND 2,250,000, including a Predator Cestus 310 mouse and a helmet. 3/4 is branded Acer.
