Acer's new laptop has a 15.6-inch LED screen, 120Hz scanning frequency and Nvidia's 3D Vision glasses. Taiwan computer maker also equipped its model Acer Arcade Deluxe software to help users simulate 3D images from normal 2D images in videos or DVDs.

The Aspire 5745DG is quite powerful, including an Intel Core i3, i5 or i7 processor, a GeForce GT 425M graphics card, up to 16GB of DDR3 RAM, a large capacity hard drive and a Blu-ray drive.

It also comes equipped with a number of other common connections like Wi-Fi standard n, Gigabit LAN and Bluetooth.

The Aspire 5745DG official price and "no shelf" price is currently unavailable.
