

## Acer launched the new Aspire laptop

The two new generations of AS4560 and AS5560G both perform well the office tasks and bring the 'top' entertainment space to users.

**The two new generations AS4560 and AS5560G both handle office tasks and bring "top" entertainment space to users.**

The most notable advantage in the laptop version of Acer Aspire 4560 is the advanced APU A8-3500 / A8-3520 processor from AMD for outstanding graphics processing and computing capabilities. The power of the APU A8-3500 / A8-3520 comes from the optimal combination of three key components, the North Bridge chip, four CPU cores and the discrete AMD Radeon HD 6620G graphics processor, 512 MB. Therefore, users can be satisfied with their ability to handle super-fast jobs.

On the other hand with Llano APU technology containing more than one million AMD transistors, users can balance the workload efficiently with Turbo Cores technology with small size kernel but the performance reaches 90% of the processor core. The size is much larger, thus saving considerable power.

Powerful configuration.

The Aspire 4560 and 5560G are equipped with AMD's latest graphics technology that automatically switches between a shared card and a discrete graphics card. This increases graphics processing performance and maximizes battery life. And yet, Llano APU technology produced by 32 nm process technology allows Aspire 4560 to save battery to the utmost, extending its usage time and hardly causing heating up when used.

Not only does it bring satisfaction to work performance, the AS4560 is also a great assistant for professional gamers with a high-end application package that meets the most demanding games today. These include graphics devices that support DirectX 11, Unified Video Decoder 3 (UVD3), OpenCL 1.1, Open GL 3.1, OpenEXR High Dynamic-Range (HDR), Shader Model 5.0 that most games require as Battlefield 3, Dirt 3.

In addition, according to experts, Aspire 4560 can perform Full HD movies (1080p) well, surf the web quickly, play 3D games well . In addition, supporting RAM 4 GB DDR3 allows the device to improve game handling and tasks faster and smoother.

Sophisticated design with scratch resistant prints and affordable price of VND 10,990,000 are also outstanding advantages of the machine.

Fashion Designer.

And the Acer AS5560G is one of the most *sought-after* laptops on recent technology forums. Exceptional configuration with the most advanced AMD APU A8-3520 processor with up to 8 GB RAM, HDD up to 750 GB is the first highlight with hi-tech followers.

Thanks to its superior processing power, all the most demanding graphic design needs are neatly and smoothly resolved with fast speed for outstanding work performance. The Acer AS5560G is the best choice for both work and entertainment.

In addition to owning almost all the advantages of juniors AS4560, the AS5560G is more ideal when equipped with a high-resolution LED-Backlit CineCrystal display for smooth, vivid display. This advantage has special significance for gamers passionate about high-end graphics games, providing extremely entertaining moments of "*peak*" after work hours.

The minimalistic design and spacious keyboard including the numpad are convenient when working with spreadsheets to show that the AS5560G prioritizes the configuration and comfort of the device.

This new generation laptop is also equipped with all the necessary features to meet all entertainment needs such as watching full HD movies, playing 3D games, surfing the web super fast . and other practical applications.

In addition to AMD Radeon DUAL GRAPHICS technology, a combination of onboard graphics and AMD Radeon HD 7670M 1 GB VRAM graphics will increase image quality and graphics capabilities by up to 123% in game processing and High-end graphics application.

More importantly, with the "*pleasant*" price of VND 12,960,000, owning AS5560G is entirely in the ability of the majority of users.
