

## Acer reduced the price of notebooks

In order to compete with the notebook makers of the last major 'Acer' group, Acer has decided to cut the price of its products by \$ 50.

**In order to compete with the notebook makers of the last major 'Acer' group, Acer has decided to cut the price of its products by \$ 50.**

As one of the "giants" in the manufacturing industry of Laptops and Notebooks, however, Acer has recently faced significant competition from other notebook manufacturers such as Asus. Acer has reduced the price of some of its products to regain its position in the worldwide Notebook market.

Ready for the 'battle' with Aus Eee PC and MSI Wind, the Acer Aspire One has launched a campaign to discount some of the popular Notebooks.

For notebooks with Windows XP -120Gb hard drives, 1Gb Ram previously purchased for \$ 400 is now only \$ 350.

Notebook using Linux operating system - 8Gb SS, 512 Mb Ram dropped from \$ 380 to \$ 330.

Users will receive a discount with Notebook with 3 Batteries, if using a 6 pack Battery price will range from 400USD to 380USD as usual.
