

Acer upgraded the configuration for the cheapest Chromebook model in the market

Acer C7 Chromebook has a new RAM memory of 4 GB, a 6-cell battery pack for about 6 hours.

Acer C7 Chromebook has a new RAM memory of 4 GB, a 6-cell battery pack for about 6 hours.

Acer C7 Chromebook.

Acer has launched the **C7 with a very cheap price** , only 199 USD, last year. However, this product also has some problems, especially the use time is less than 4 hours, quite a bit compared to a device that enhances mobility.

In order to overcome this drawback, Acer today started ordering samples of C710-2055 Chromebook with the processor kept the same but RAM increased from 2 GB to 4 GB and the battery was also replaced by 6 cell capacity for The usage time is about 6 hours.

The product price is 280 USD, equivalent to about 5.8 million VND. This price makes C7 less attractive because it has close access to cheap laptop models running Windows 8 on the market.

The company also offers another option to upgrade RAM but not upgrade the battery. The C710-2487 has 4 GB of RAM and about 4 hours of battery life. The price for this product is 260 USD.
