

# Activate Windows Spotlight on Windows 10

Windows Spotlight is a new feature on Windows 10, allowing users to download and use the daily featured photos from the Bing Images for use as a lock screen, besides you can vote, comment on the picture. This feature is good, so you can change the Lock Screen wallpaper regularly automatically with the best images.

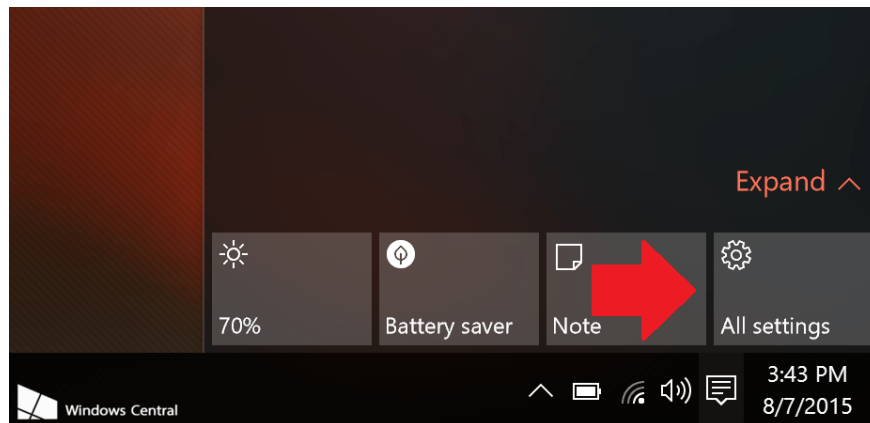

Windows Spotlight is a new feature on Windows 10, allowing users to download and use the daily featured photos from the Bing Images for use as a lock screen, besides you can vote, comment on the picture.

This feature is good, so you can change the Lock Screen wallpaper regularly automatically with the best images.

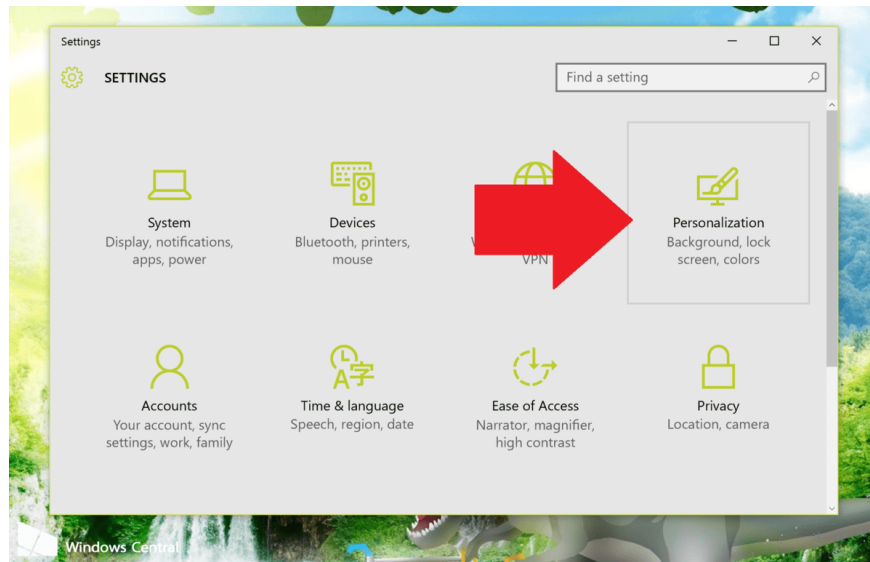

In the article below, Network Administrator will guide you through the steps to enable Spotlight on Windows 10.

## Instructions for activating Windows Spotlight on Windows 10:

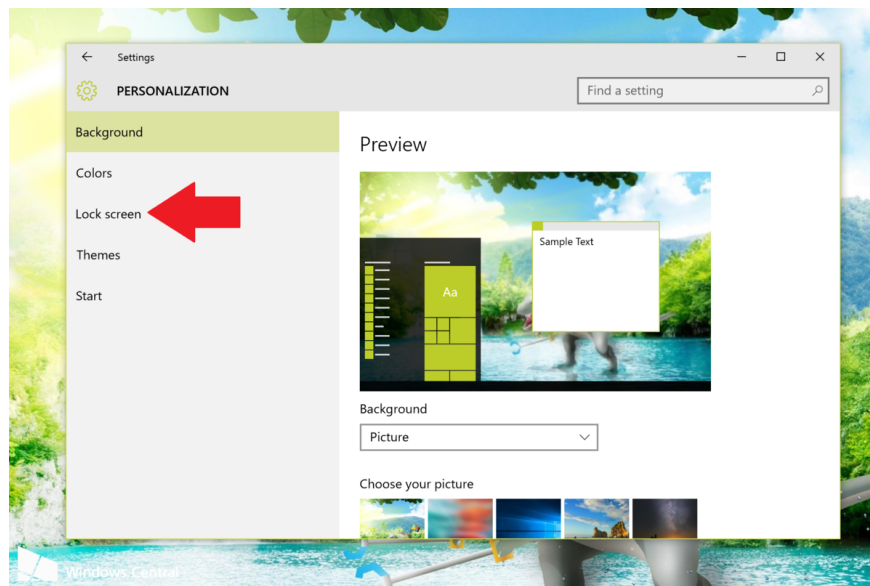

1. Open **All Settings** in the Taskbar.

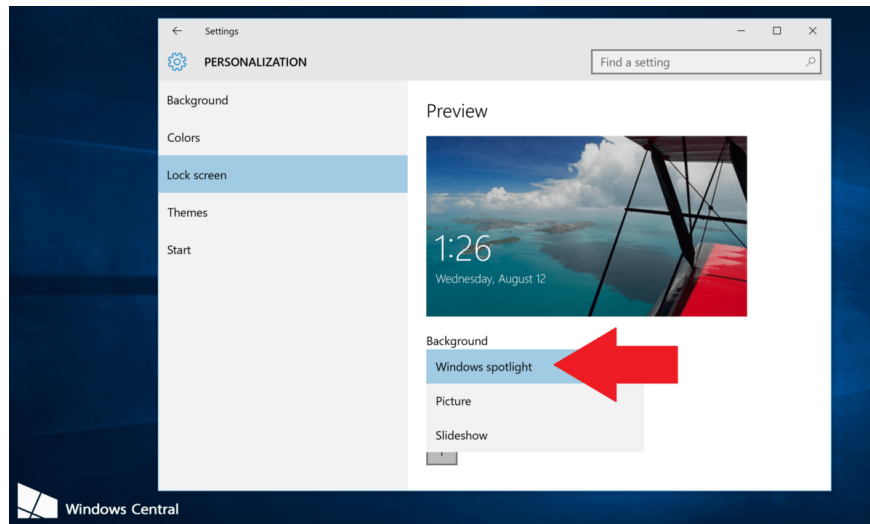

2. Find **Personalization** .

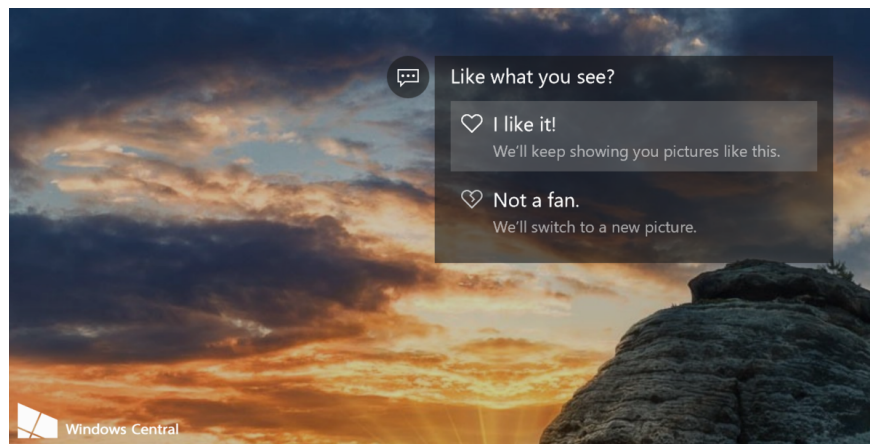

3. Select **Lock Screen** .

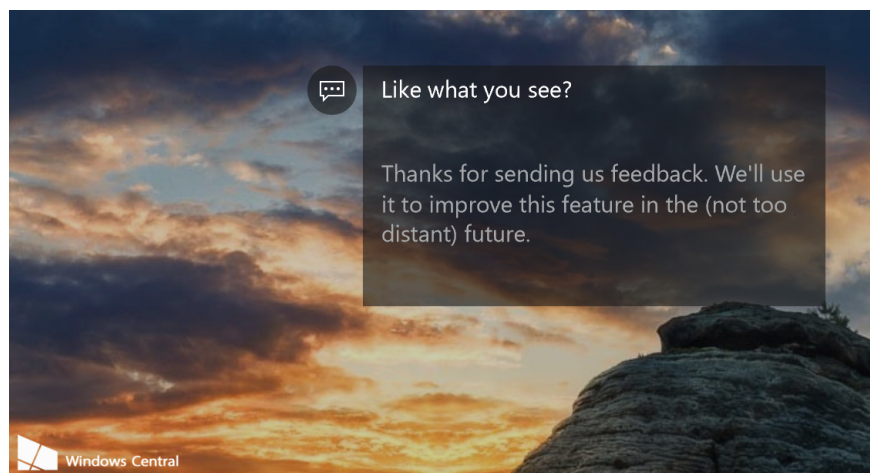

4. Under Background, select **Windows Spotlight** .

At this time the screen will appear **Like what you see?**

When you click on it will appear options **I like it!** and **Not a fan** so you can choose whether you like the current wallpaper or not.

So you have completed the process of activating Windows Spotlight on Windows 10.
