Tonight was Christmas Eve, one of the happiest holidays of the year. Do you have any activities to welcome? Why don't you make cute, cute cards to send to your loved ones? Today, TipsMake.com will introduce you to a way to make another card extremely fast and simple. Let's refer to offline.

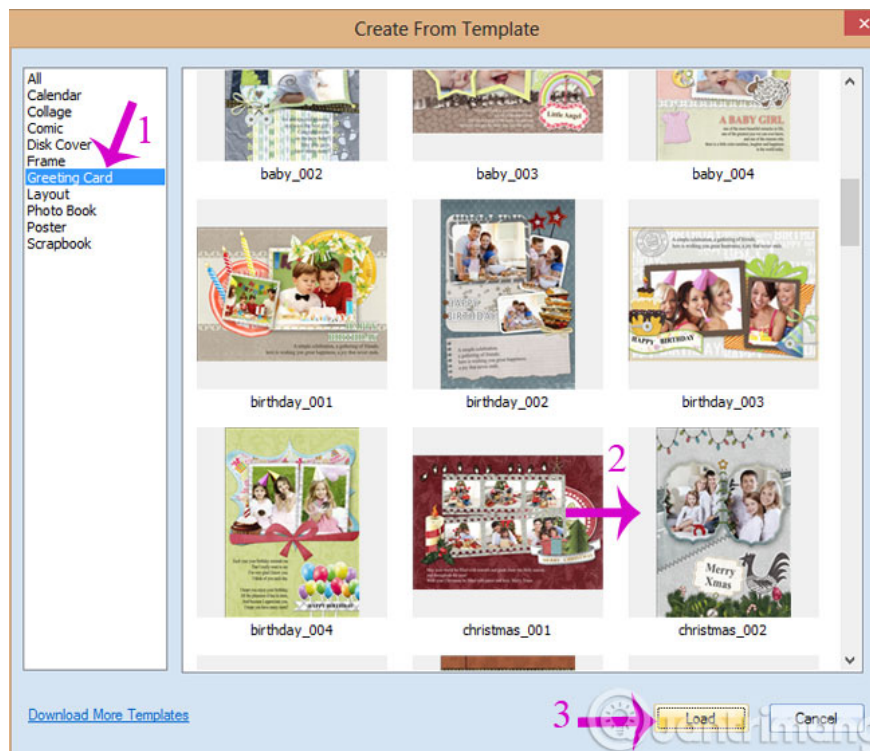

Tonight was Christmas Eve, one of the happiest holidays of the year. Do you have any activities to welcome? Why don't you make cute, cute cards to send to your loved ones? Today, TipsMake.com will introduce you to a way to make another card extremely fast and simple. Let's refer to offline.

First, install **Picture Collage Maker** software on your computer

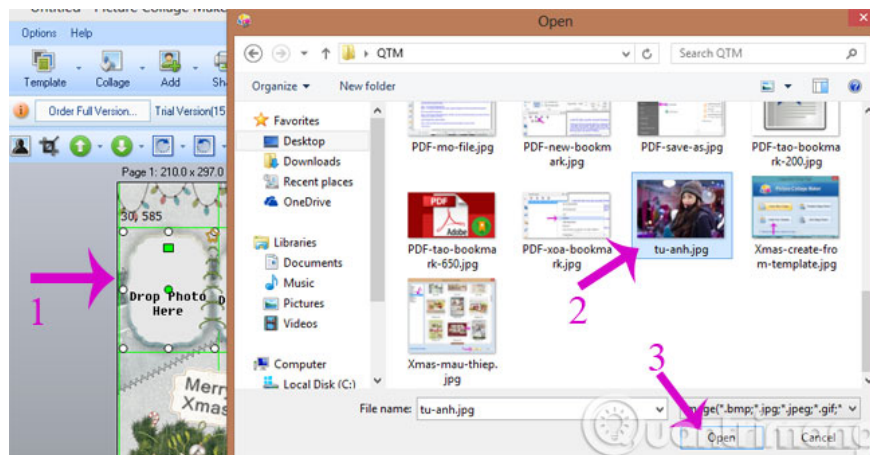

**Step 1** : From the main interface of the software, press **Create From Template**

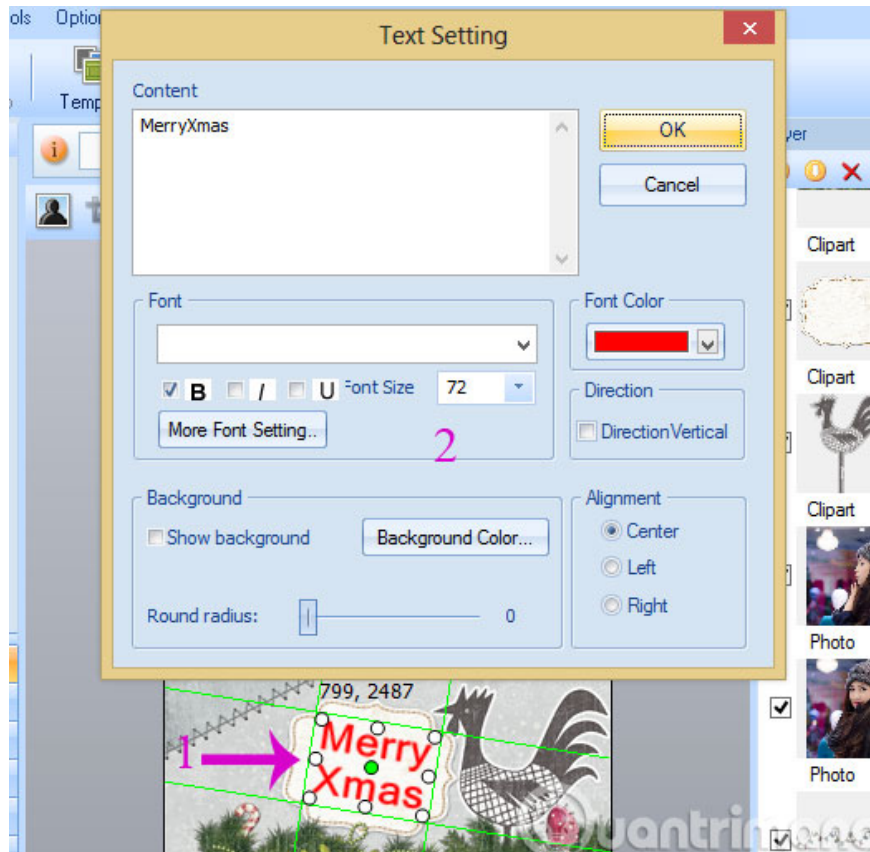

**Step 2** : At the new window interface, select **Greeting Card** in the left menu and select the card template you like on the right. Then, click **Load** .

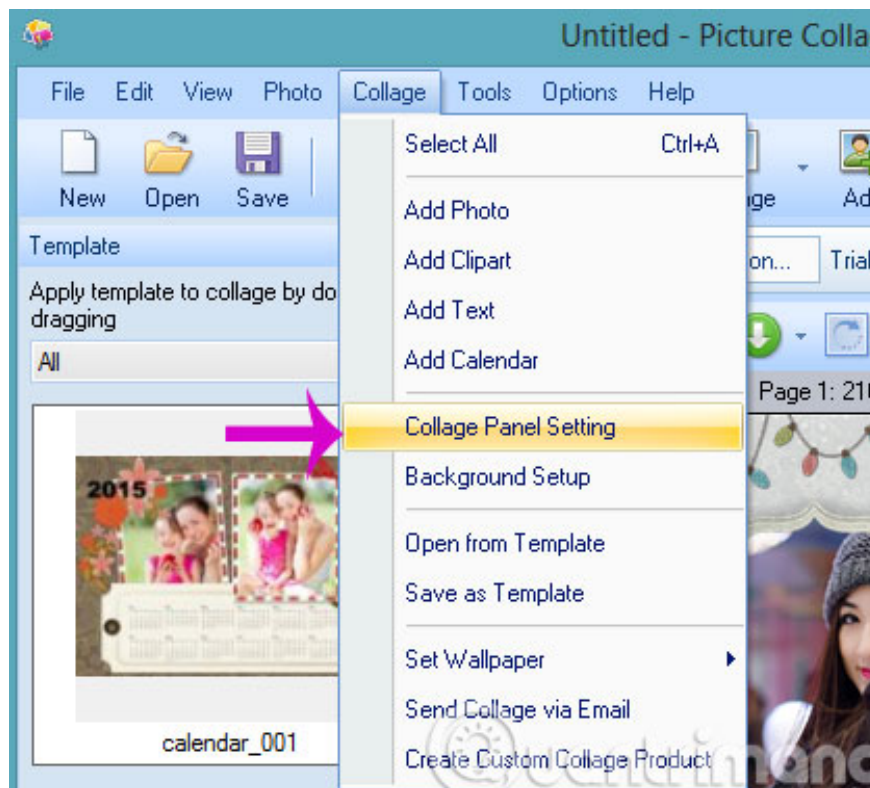

**Step 3 :** In the new interface, double click on the frame to insert images into the card

**Step 4 :** Click on **Merry Xmas** word to proceed to edit the wishes

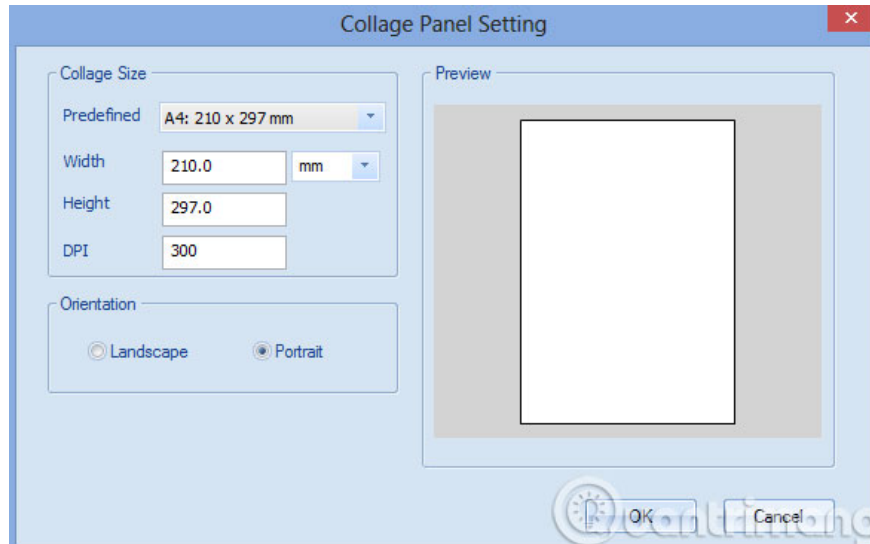

**Step 5 :** To adjust the size of the card, go to **Collage** menu, select **Collage Panel Setting**

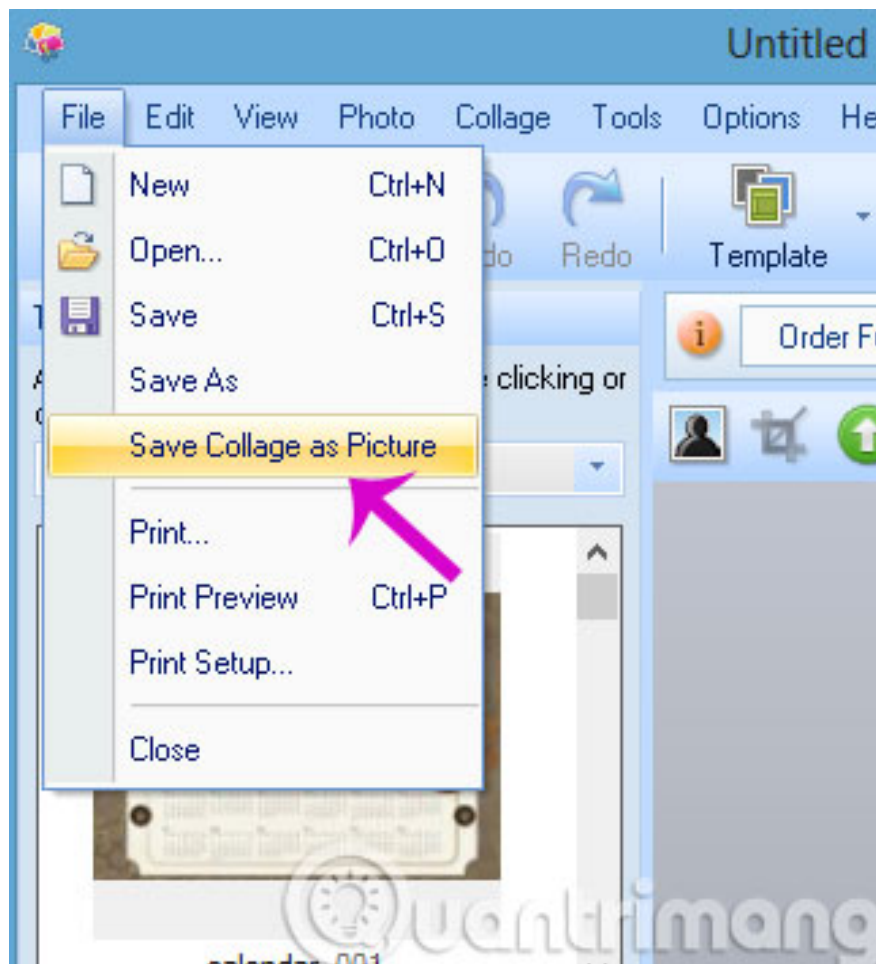

**Step 6 : Collage Panel Setting** window appears, in **Collage Size** section you can change some of the following parameters:

1. **Predefined** : Select the size and layout of the Christmas card in advance.
2. **Width** : Width for the card.
3. **Height** : Height for the card.
4. **DPI** : Resolution for the card.

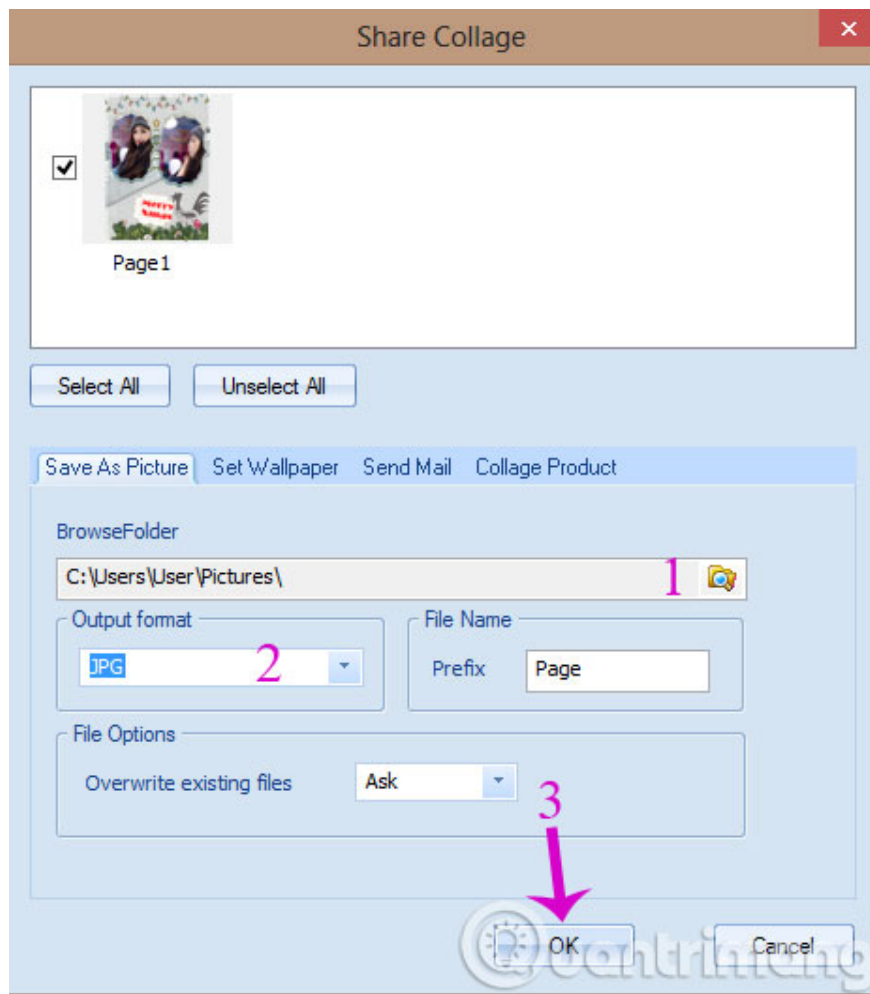

And choose the size of the card in the **Orientation** section, there will be two options: vertical and giant. Depending on the preferences of each person, customize the parameters accordingly. Then, press the **OK** button to save the settings.

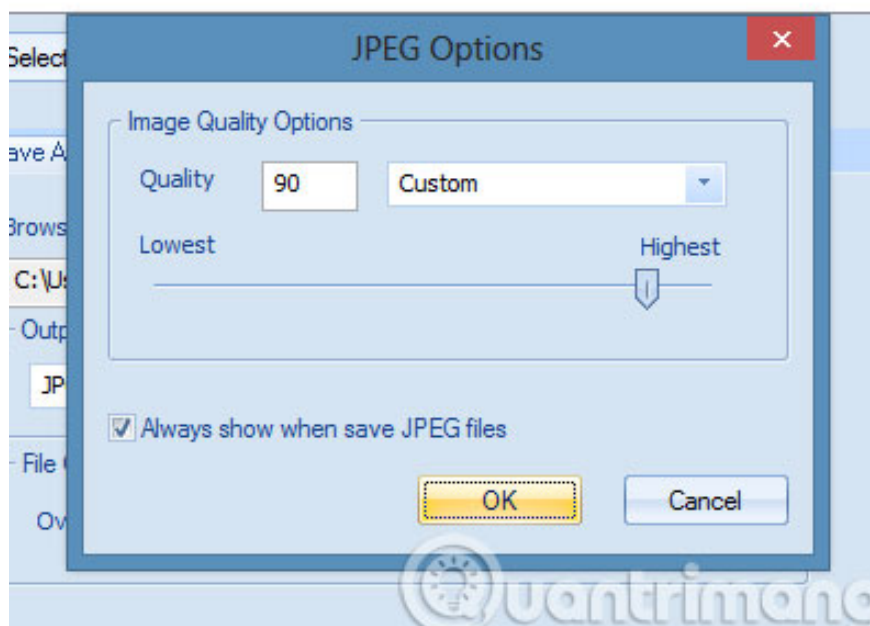

**Step 7** : Once satisfied, save it by going to the **File** menu, selecting **Save Collage as Picture**

**Step 8 :** In the **Share Collage** dialog box, proceed to change some options for the output and click **OK**

**Step 9** : The **JPEG Options** window appears, you can adjust the output quality freely and then press **OK** to save the image
