

Add text to GIF images, add text to animated images.

Adding text to GIFs might seem like a difficult task, something only experts and designers can handle, but you can easily add text to GIFs, add text to animated images, and create custom animations with the convenient online tool Ezgif.

Since Facebook allowed users to upload GIFs, the trend of users creating GIFs has increased significantly. Users can create GIFs using PhotoScape , Photoshop, or many other animation software programs.

However, after using a combination of **GIF creation software** , users often don't know how to insert text into GIFs just like with regular photos. So how can you add text to GIFs or animated images more easily and vividly?

Add text to GIF images, add text to animated images.

Step 1: Access the Ezgif.com website or click **here** .

After accessing the **Ezgif** page , click on the **Add Text** option .

Step 2: Next, click on the " **Browse ...**" option to select the GIF image you want to add text to. Alternatively, Ezgif also provides users with another way to enter information using the image link if the GIF was found online.

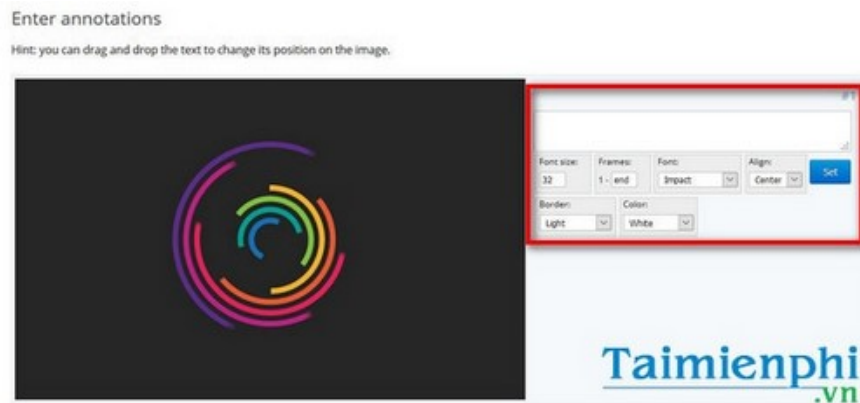

Please note that the maximum image size supported by this service is **20MB**, so if your GIF image is larger, this trick will not work, and you will have to use tools like Photoshop.

After successfully selecting the image, click **Upload** to upload it to the system and begin the process of adding text to the animated image. Depending on the size of the GIF image, you may have to wait a few seconds or a

few minutes.

Step 3 : After successfully uploading, the next step is to enter text in the GIF image using the customization tool next to the image. If the GIF image has multiple frames, you can customize more for each frame, or you can simply enter text for the first frame.

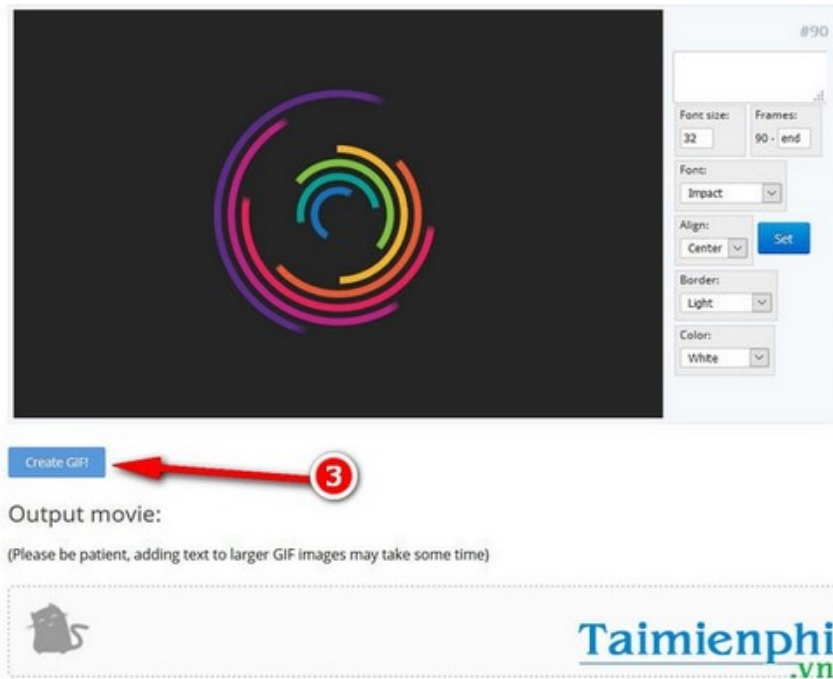

Users have options for Font Size, Font Style, Alignment, Border, and Color.

After selecting the parameters, press **Set** to configure them.

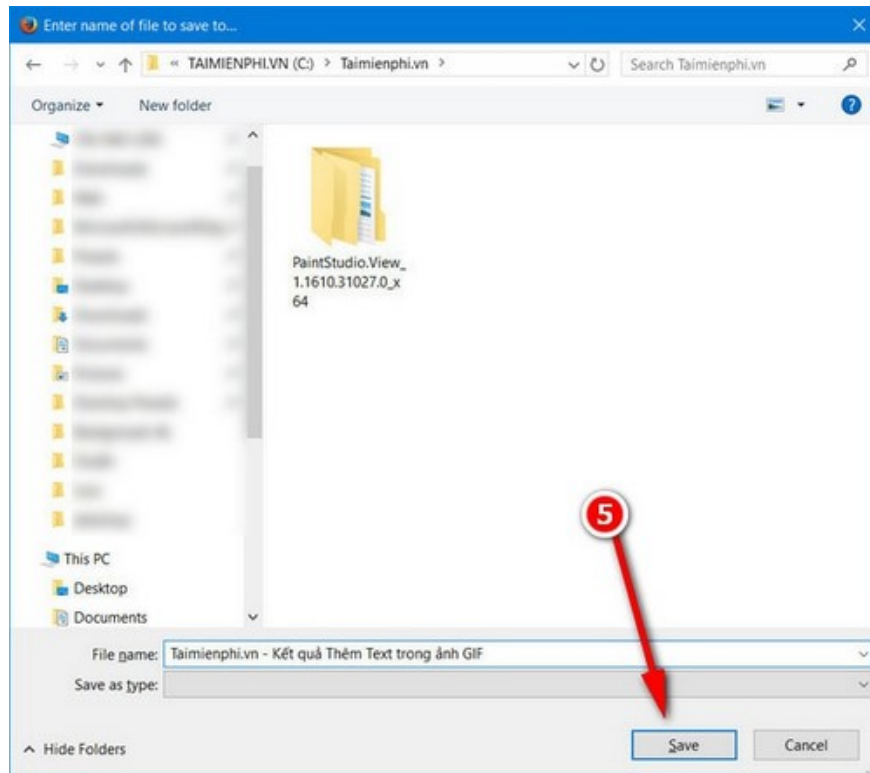

Step 4 : Finally, scroll down to the last frame and select "**Create GIF**" to start adding text to the animated image.

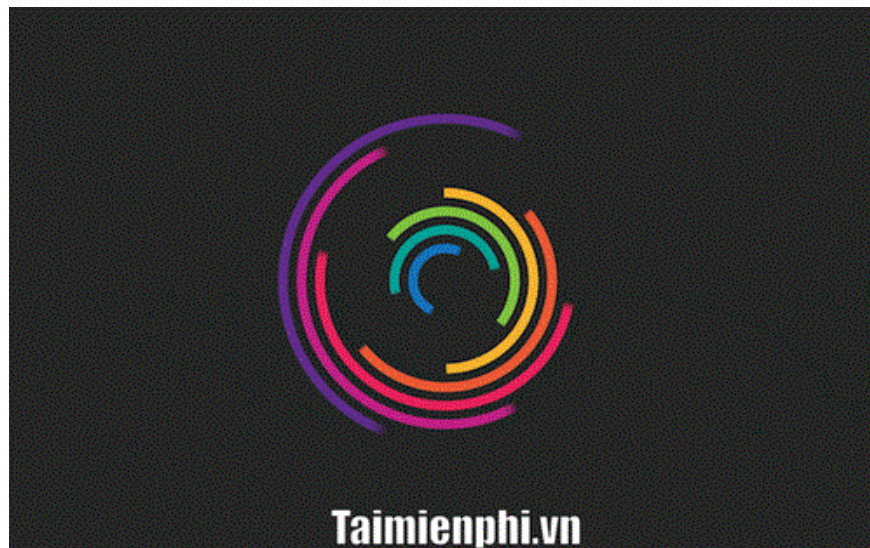

You may have to wait a few moments to see the results.

Right below the image are additional customization tools such as crop, resize, or rotate. To save the GIF image to your computer, click **Save**.

Choose a location to save the photos.

And this is the result after the user added text to the GIF image.

Once you've successfully added text to your GIF, you can use it to post on Facebook or share with friends. Currently, there are many tools available to help users create animated GIFs on their computers, such as PhotoScape, Photoshop, Easy GIF Animator, GIFcam, and Advanced GIF Animator. These are all professional GIF creation software trusted by many users. Besides creating animated GIFs, software like Photoshop and PhotoScape also allow you to cut, paste, edit, or even add text.

However, the most convenient option is still online GIF editing services that add text to animated images, as they

are quite easy to use and flexible in all situations. TipsMake will introduce you to a list of the top 5 best GIF **creation** and editing software in the near future.
