

# Add the Start button for Windows 8 in just a few minutes

One of the disadvantages of users when using Windows 8 is that there is no classic Start Menu button like previous Windows operating systems. Therefore, the operation will become slower when you need to open applications such as Control Panel. Fortunately, there are a lot of software that supports creating Start button on Windows 8, to help you get back to the familiar feeling like on Windows 7.

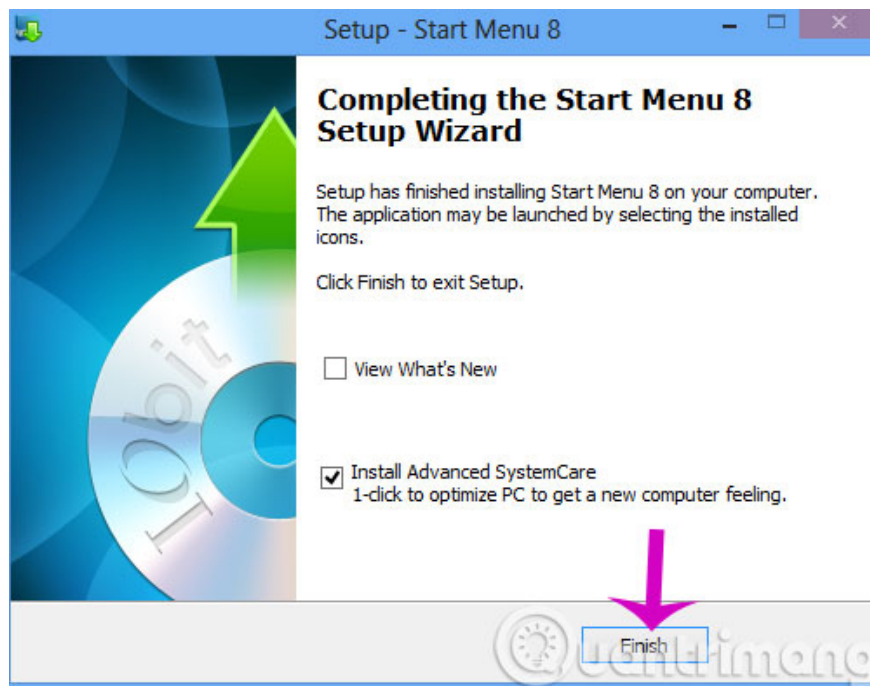

One of the "inconveniences" of users when using **Windows 8** is that there is no classic Start Menu button like previous Windows operating systems. Therefore, the operation will become slower when you need to open applications such as Control Panel. Fortunately, there are a lot of software that supports creating Start button on Windows 8, to help you get back to the familiar feeling like on **Windows 7**.

TipsMake.com will introduce to you one of the most popular software today to create Start button for Windows 8 which is **Start Menu 8**.

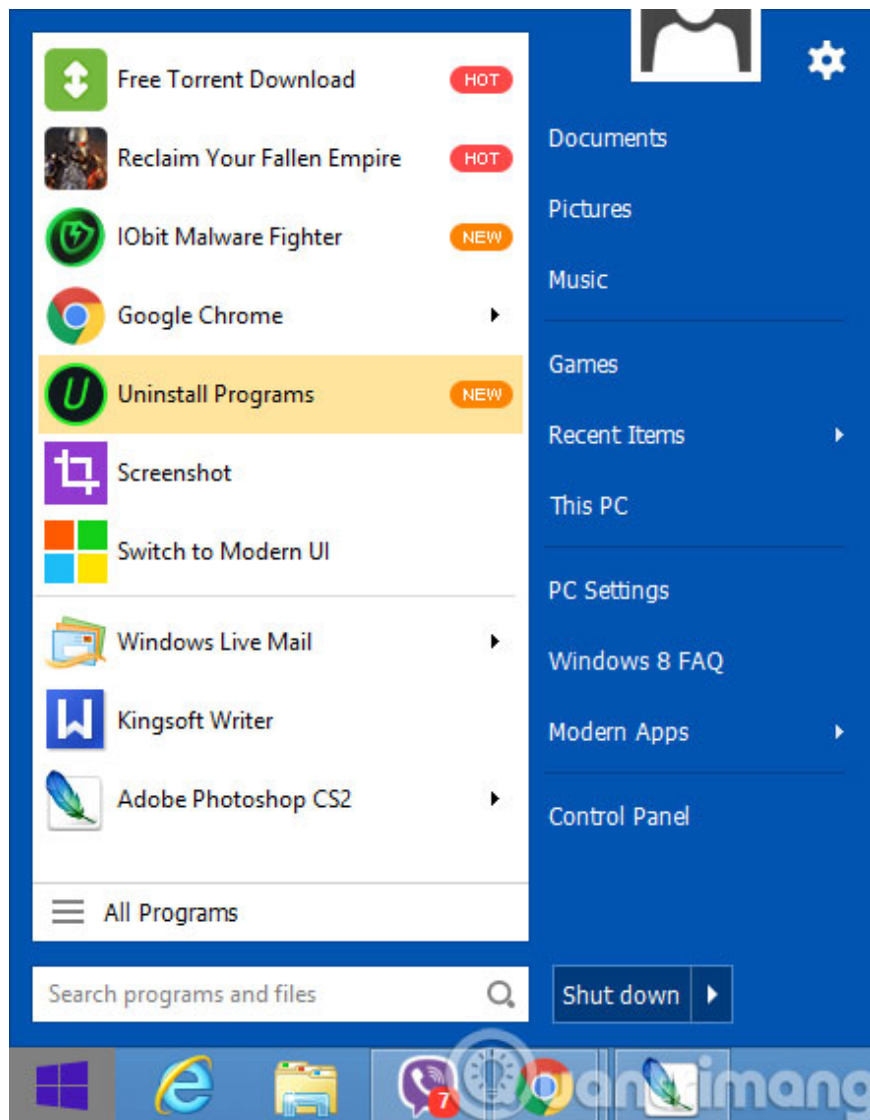

**Step 1** : Download and install it on your computer

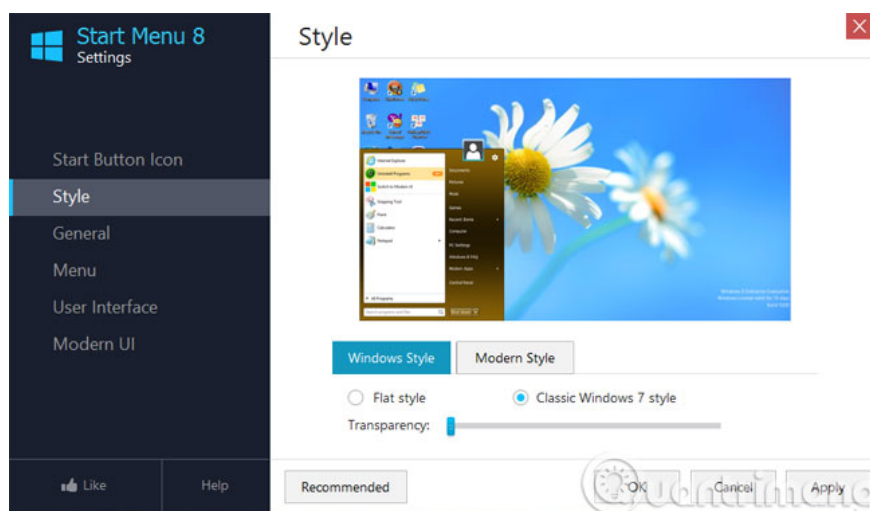

**Step 2** : When the software is installed, click Finish to finish

**Step 3** : After the installation is complete, you will see the application's Start Menu interface very similar to the Windows 7 Start Menu button.

**Step 4 :** You can also customize the Start Menu button icon in **Settings** (shortcut Alt + S)

It can be seen that creating a Start Menu button on Windows 8 is very simple right? This makes it possible to use the classic Start button from previous Windows versions on Windows 8, so the process of manipulating and using computers becomes easier than ever.

1. Use wireless network in Windows 8
2. How to change the login screen on Windows 8?
3. Free note-taking software for Windows 7 and 8

**Good luck!**
