Mobile air-conditioner has many types, meeting a variety of usage needs.

What is a portable air conditioner, mini air conditioner? Are there any types?

Mobile air-conditioners, mini-air conditioners also use refrigerant (gas) to cool like traditional air-conditioner, however, there is no need for fixed installation to be used that can be flexibly moved to many different locations. thanks to the moving wheel system installed on the base.

Mobile air conditioner has 2 main product lines:

1. **Industrial portable air conditioners** : There is a large capacity, with wind pipes (can be adjusted in the direction) for cold air to escape outside, used for cooling in large areas such as factories, factories .
2. **Mini portable air conditioner** : Has a small capacity (only about 0.5 - 1.5HP), is a miniature version of vertical air conditioner, used for cooling in small areas or inconvenient to install air conditioner on wall or need to move regularly.

Mini mobile air conditioner with modern remote control.

What are the characteristics of mobile air conditioner, min air conditioner?

Mobile air conditioners and mini air conditioners have the following advantages:

1. Can be used immediately without installation, easily move to different cooling locations quickly and conveniently.
2. Quick, deep cooling, easy temperature adjustment, can reduce room temperature by about 5-10 degrees C depending on the weather or specific cooling needs.
3. Industrial portable air conditioners allow for flexible wind direction adjustment, making it convenient to quickly cool in 1 or more fixed positions.

Mini mobile air conditioner has a capacity suitable for small rooms, equipped with many modern features such as wind sleep, dehumidification, air filter, timer . as on traditional air conditioning, bringing utilities max when using.

Buy mobile air conditioners, mini air conditioners need to pay attention to what?

When buying a mobile air conditioner, mini air conditioner, you will need to note some points as follows:

1. Select a machine with cooling capacity suitable for room area, for example:
Rooms with an area of less than 15 square meters choose a mini mobile air conditioner with a cooling

capacity of about 9,000 BTU (1 HP).

Room with an area of ??15-20 square meters, select mini mobile air conditioner with cooling capacity of about 12,000 BTU (1.5 HP).

Rooms with an area of ??20 square meters or more should choose industrial portable air conditioners with a cooling capacity of about 18,000 BTU (2 HP) or more.

2. Selecting a machine with specifications, features that meet the needs of use, avoiding selecting too high parameters or many redundant features will be wasteful.

3. Choose a machine that works smoothly, with little noise so it does not affect your life and work.

4. Select the device with the right price:

The price of mini mobile air conditioner is usually about VND 7 - 23 million.

Industrial air-conditioner prices are usually about VND 40 million or more.

5. Choose machines from reputable brands like Casper, Midea, Kachi, Nakatomi . to ensure the best quality and durability for the device.
