## What is an essential oil diffuser?

Essential oil diffuser, also known as aromatherapy lamp, is a machine designed to diffuse the aroma of essential oils into space to create a cool, clean bacterium that helps users to enjoy. energetic starter.

This machine usually has a small compact design, suitable for a lot of space from bedroom, dining room, living room, office .

## What kind of oil diffusers are there?

Currently, in the market of oil diffuser machine is divided into 4 basic types below:

### 1. Ultrasonic oil diffuser

**Principle of operation:** This machine diffuses essential oils into smaller particle molecules so they can spread to the room space.

#### Advantages:

1. No more essential oils during use.
2. Provides moisture to the skin especially in dry weather.
3. Smooth operation does not cause unpleasant noise.

#### Defect:

1. Some models will have light that cannot be turned off so it will be annoying for some people.
2. Machine must be cleaned continuously and should be avoided using tangerine and oranges, which will make the machine dirty.

### 2. Mist oil mist diffuser

**Principle of operation:** This machine diffuses pure essential oils by dispersing them into small molecules to form a thin mist from which to create a cool aroma atmosphere.

#### **Advantages:**

1. Save the original scent of essential oils.
2. Can be used in a wider space than other machines.
3. Having a timer and a notification can help you know when your essential oil is gone in time.

#### **Defect:**

1. When operation causes noise.
2. Because of the ability to keep the original essential oil, it is quite expensive. You need to refill essential oils regularly.
3. There are quite high prices compared to other models.

### **3. Evaporator essential oil diffuser**

**Principle of operation:** Essential oil diffuser by blower mechanism helps evaporate oil in the air with a filter.

**Advantages:**

1. Low price.
2. Diverse designs with many designs with artistic styles, help adorn the living space of each house.

**Defect:**

1. Running for a short time.
2. The essential oil may be separated.

**4. Heat oil diffuser**

**Principle of operation:** The machine works by using heat to create scent for the surrounding space.

### **Advantages:**

1. The cheapest price among 4 types.
2. Provides effective diffusion of essential oils in small rooms.

### **Defect:**

1. The essential oil can be separated to reduce the original scent.
2. Time must be added to add water, otherwise the disc containing the essential oil may be cracked.

The above 4 types of machines all have their own advantages and disadvantages, you can base on the needs of use, economic conditions and many other factors to be able to choose the most suitable machine.

## **Some points to note before buying an oil diffuser**

### **1. Select the operating capacity of the machine in accordance with the usage space:**

Each machine will have a different operating capacity, so it is important to determine the area of space where you want to use it.

If the room has an open space, you should choose a machine with a large capacity, and in the bedroom you should only choose a machine with a small capacity.

### **2. Function of the machine:**

Depending on your needs, you can choose the appropriate device. If you like the scent gently, you should choose to evaporate or diffuse with heat.

### **3. Design:**

Often the diffuser material will be made from ceramic, wood or plastic. You can rely on hobbies and consider your home furniture to choose the machine that best fits the space.

#### 4. Time to use the machine:

Based on your usage, choose a machine with long life, durability and stability to avoid waste.
