

Adjust screen brightness on Acer laptop.

Adjusting the screen brightness on an Acer laptop is very simple. Users can use keyboard shortcuts, adjust the brightness in Windows Mobility Center, set the brightness in the Battery settings, or install third-party software to adjust the laptop screen brightness.

Acer laptops are a well-known brand from Taiwan, and are currently trusted by many users worldwide, including Vietnam. Most Acer laptop models are equipped with Full HD resolution screens, providing incredibly sharp images and colors. Users can easily adjust the screen **brightness of Acer laptops** without difficulty; in fact, it's very simple with just a single operation to adjust the screen brightness to suit their needs and protect their eyesight.

Adjusting screen brightness on Acer laptops

Guide to adjusting screen brightness on Acer laptops

You can increase or decrease the screen brightness of your Acer laptop in one of four ways:

Method 1: Use keyboard shortcuts to adjust screen brightness.

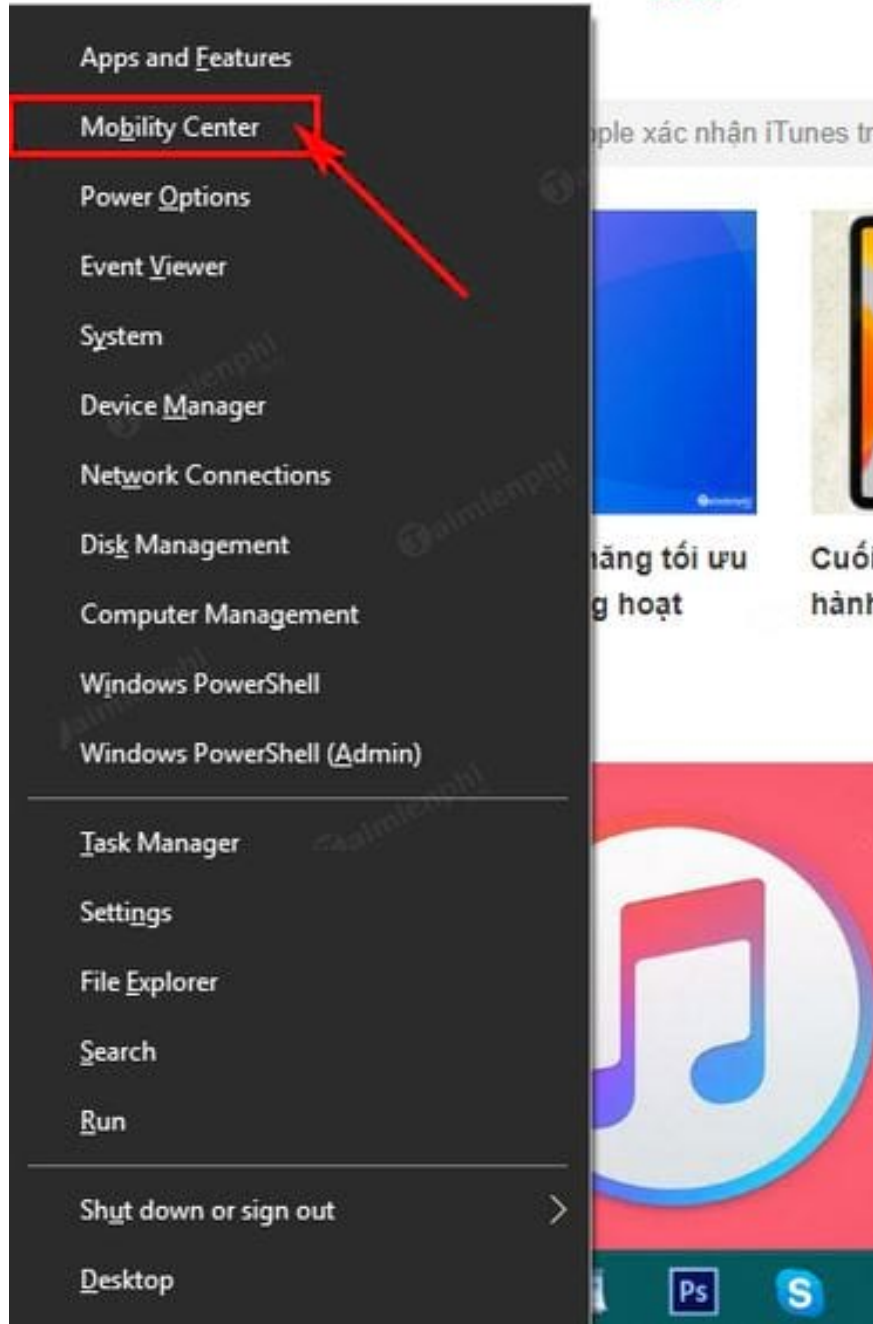

For Acer laptops, the shortcut key is: **Fn + left/right arrow key** => This means you use the **Fn** key plus the **left arrow** key to decrease brightness; **Fn** plus the **left/right arrow** key to increase brightness.

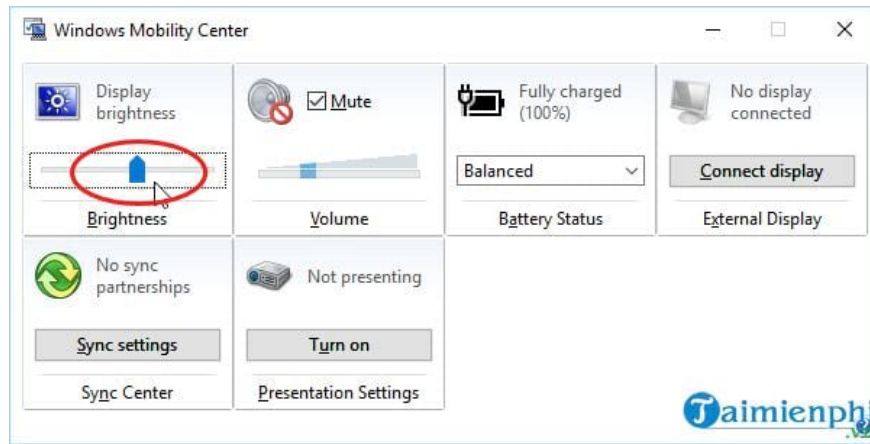

In addition to using the keyboard shortcuts above, you can also adjust the brightness of your laptop screen in other ways.

Method 2: Adjust screen brightness in Windows Mobility Center

On computers and laptops running Windows 7, 8, 8.1, and Windows 10, press the Windows + X key combination -> then select Mobility Center .

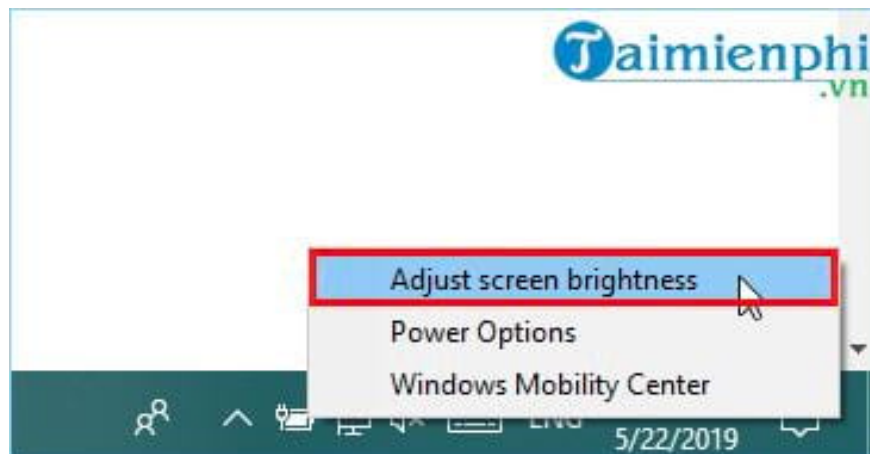

In the new interface that appears, you will see the screen brightness adjustment bar under **Display Brightness** -> You can drag the slider to the left or right to increase or decrease the brightness of your computer or laptop screen.

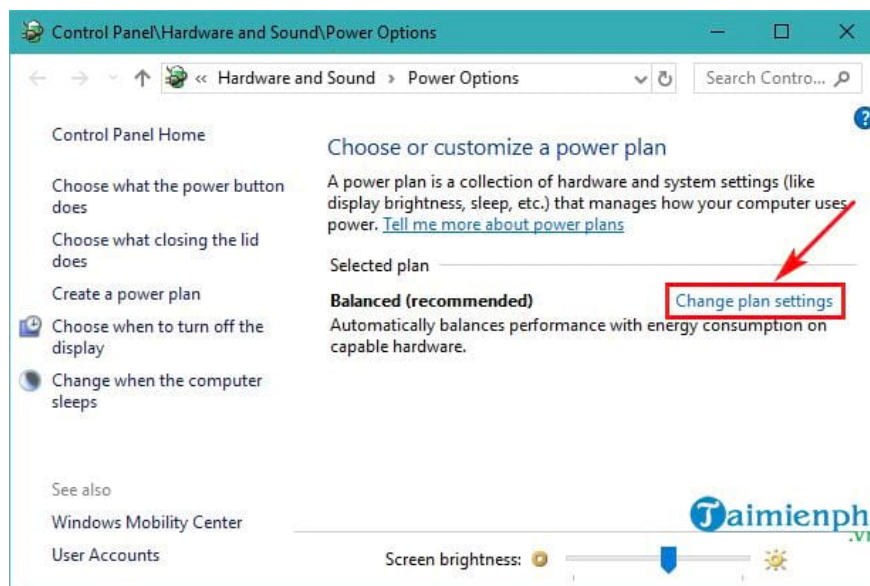

Method 3: Adjust screen brightness in the Battery and Charging settings.

To do this, click on the battery icon in the bottom right corner of your laptop screen -> then select **Adjust screen brightness**.

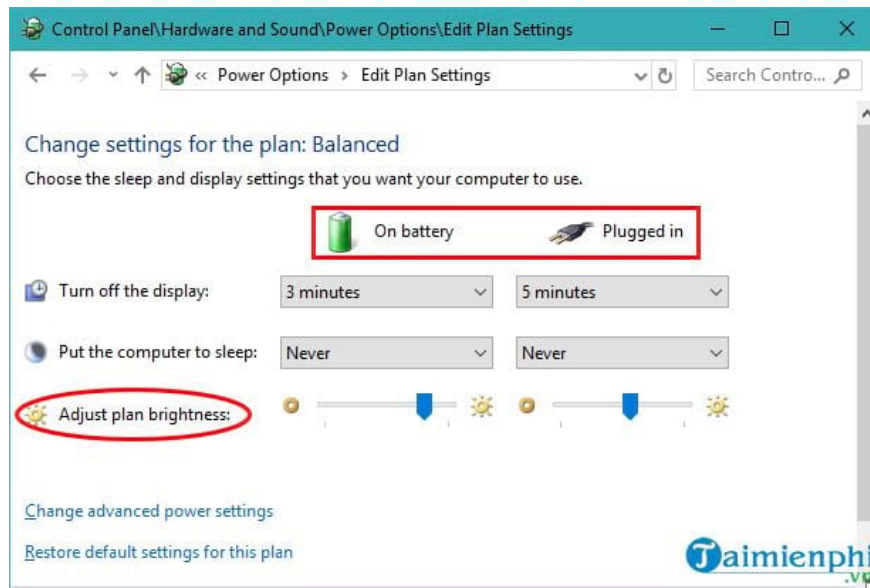

In **Balanced** , select **Change plan settings** as shown in the image below:

In the **Change settings for the plan: Balanced interface** , you will see two columns:

- **On Battery** : When using battery power
- **Plugged In** : When using charger

In **Adjust Plan Brightness** , you can customize the screen brightness to your liking.

Method 4: Adjust screen brightness by installing additional software.

This method involves installing specialized software on your laptop that allows you to adjust the screen brightness.

You can use one of the five software programs we introduced in the article "Top 5 Software Programs for Adjusting Laptop and Desktop Screen Brightness" on TipsMake.

Therefore, **adjusting the screen brightness on an Acer laptop** is not difficult, in fact, it's very simple. Similar to other laptops, you can use keyboard shortcuts to quickly increase or decrease screen brightness, adjust the brightness in the Display Brightness settings, or install specialized brightness adjustment software. all are possible.
