

# Adjusting skin tone to be smooth and white in PhotoCat is extremely easy.

Are your photos dull and lacking in radiance because of dark skin and imperfections? PhotoCat helps you achieve naturally bright and smooth skin in just a few simple steps. This online tool gives you radiant skin instantly.

Want to have smooth, fair skin in your photos without Photoshop? PhotoCat helps you edit quickly and easily. Discover how to use it to get the perfect photo.

## *The secret to whitening skin using PhotoCat*

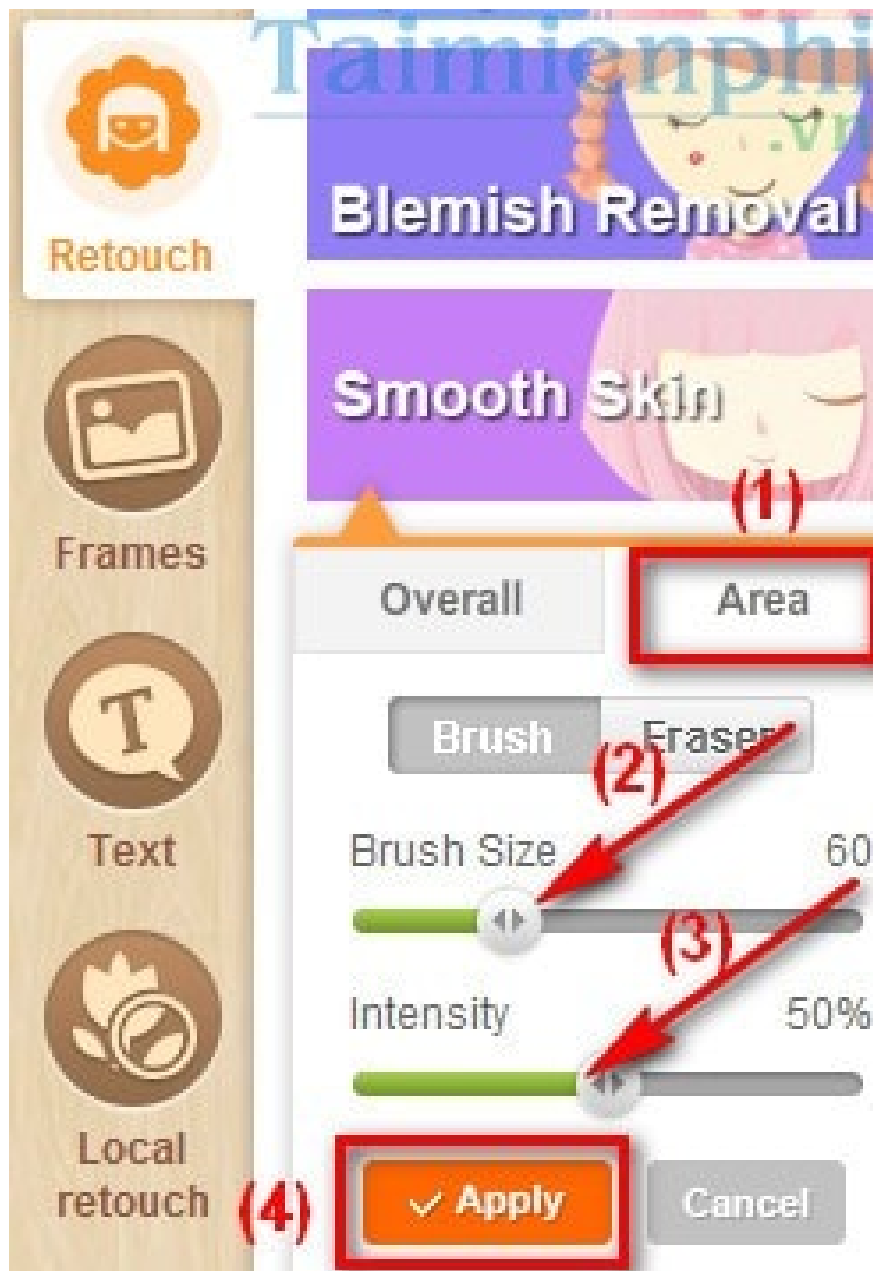

*Step 1:* Access the website: click **Upload** to upload the image you want to edit from your computer.

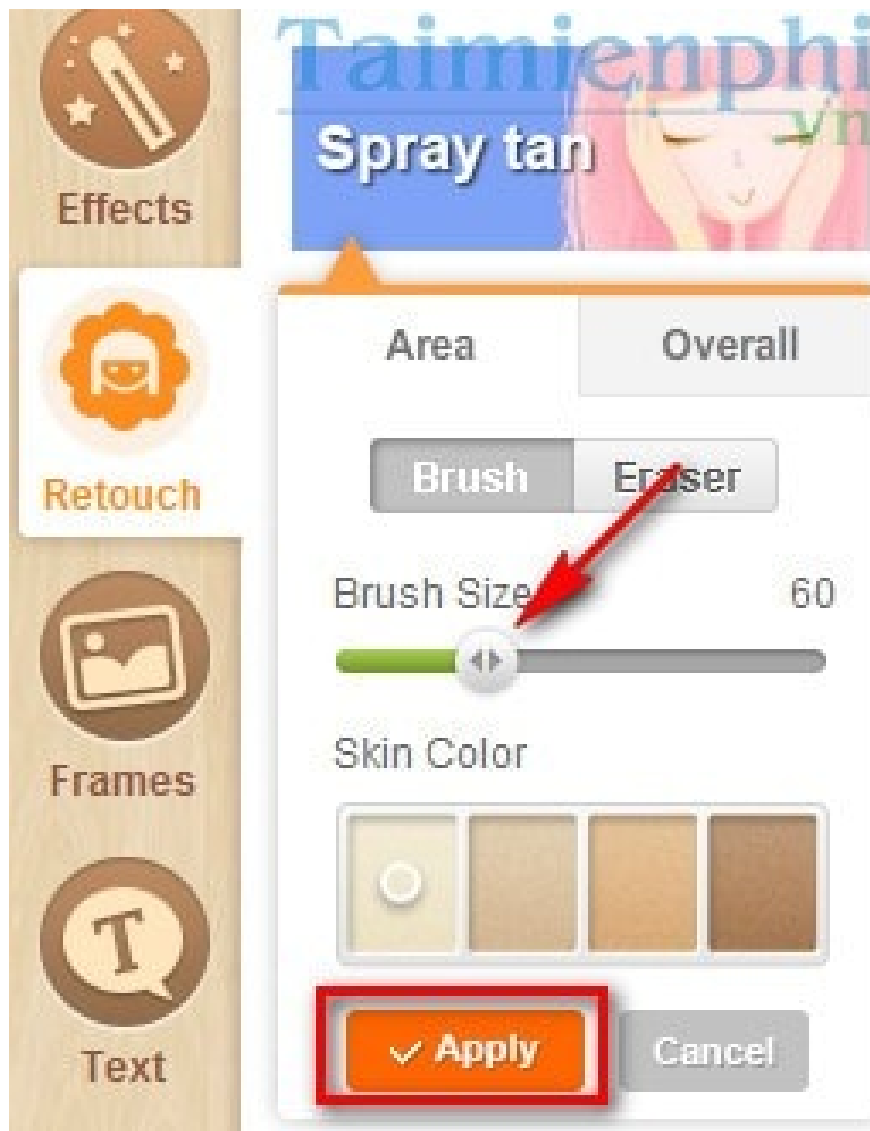

*Step 2:* To whiten and smooth the skin, select the Retouch function --> **Smooth Skin** --> **Overall** to whiten the entire image. Here, use your mouse to change the **Intensity** slider until you are satisfied, then click **Apply** .

*Step 3:* Switch to the **Area** section , where you can customize each area to whiten and smooth it further. Use your mouse to change the **Brush size** and **Intensity** sliders to suit your image. Finally, click **Apply** .

Step 4: If you are still not satisfied, you can use the **Spray tan** function to make the skin whiter and pinker. As above, use your mouse to change the properties and select **Apply** to finish.

*Step 5:* After editing, you can save the image or share it with friends directly by selecting the **Save** or **Share** function.

*Step 6:* If you choose **Save**, you need to name the image and adjust the image quality and format. Click **Save** to save.
