

Admire the Super Moon in the sky of Hanoi at dawn 10/3

Here are a bunch of Supermoon photographs taken in Hanoi, please take a look.

This morning (March 10), a unique astronomical phenomenon Supermoon has 'visited' Vietnam. In Hanoi, astronomical lovers can still quite clearly observe this interesting phenomenon despite the misty atmosphere at night. At 07:47 on 10/3, the Moon reached its largest size in the western sky.

The supermoon will occur when the Moon is within 90% of the point near the Earth in the orbit of this planet.

This is the 2nd time the Supermoon takes place in 2020. According to astronomers, there will be 4 times the Super Moon takes place this year. The biggest and brightest Super Moon will take place on the night of 7 to 4/4.

Here are a bunch of Supermoon photographs taken in Hanoi, please take a look.

The supermoon appears on the roof of Hanoi Opera House on the night of March 9.

Supermoon seen from the relic of Hanoi Flagpole.

The big, bright moon fills the back of the canopy.

Astronomers can clearly observe the phenomenon of the Super Moon when it is clear and there are no other environmental conditions that obscure the view.

Image Super moon observed from a construction site in Hanoi.

Observe the big, full moon from under the bridge.

This time the Super Moon is also called the Worm Moon because it coincides with the time when the worm is active again helps the ground become porous.
