

# Adobe will launch an optimized version of Photoshop for touch screens

At the recent launch of Microsoft's Surface Pro 3, Adobe has just revealed that it is developing a Photoshop CC version to optimize the tablet / computer using touch screens and stylus.

**At the recent launch of Microsoft's Surface Pro 3, Adobe has just revealed that it is developing a Photoshop CC version to optimize the tablet / computer using touch screens and stylus.**

Icons, as well as other components of the user interface, will be doubled in size, making it easy for users to navigate with their fingertips or perform tasks such as pinch zoom. In addition, this version of Photoshop has been improved by Adobe to support high-resolution screens, like the Surface Pro 3 screen released today. These are welcome additions, because it has been considered a weakness of this photo editor ever.
