

# Advanced anti-pollution mask launched in India

A new science and technology product with the mission to protect human health from air pollution is becoming more serious and many people in the world are interested.

**A new science and technology product with the mission to protect human health from air pollution is becoming more serious and many people in the world are interested.**

Yes, the product we want to mention in this article is the newly launched anti-pollution mask in India. It is known that this is a collaborative scientific technology product between Atlanta Healthcare Company, India and British Cambridge Mask Company.

' *Product launches have high practical value, completely useful right in the period of air quality in India in particular and the world in general is at an alarming level* ' - Mr. Vibhor Jain, Director Executive of Atlanta Healthcare, India, said in a statement.

This anti-pollution mask will soon be sold on Amazon e-commerce buying site. *Photo source: Internet .*

This anti-pollution mask is manufactured according to the most advanced technology in the world including three-layer micro-particle filter technology, and it can block dust up to 0.3 microns, meeting N99 dust filtration standards.

According to information from the manufacturer, the mask consists of three layers: the first layer is the primary particle filter layer, filtering the dust particles of many sizes, the second layer will block even the small particles of PM2.5 toxic dust and the last layer is a high-grade filtered carbon layer, which is made of 100% of 2,000 nanometer activated carbon fiber fabrics invented by the UK Ministry of Defense.

This mask has a price ranging from 1799 to 2199 Rubi India (about 596,000 - 728,000 VND).
