

# After watching the series below, you will understand why the average life expectancy of men is lower than that of women

Science has proved that women live longer than men. There are many different health and psychological reasons, but one of the reasons men die earlier than women is because they like to be playful, adventurous and subjective.

Science has proved that women live longer than men. There are many different health and psychological reasons, but one of the reasons men die earlier than women is because they like to be playful, adventurous and subjective.

1. The more feathers a man has, the more intelligent he is
2. 12 interesting features that men even have "sandals" do not keep up with women
3. What region is the most hairy male in the world?

You don't believe it, take a look at the series below and you'll see it. Surely women rarely participate in adventure games like this.

The guy in the picture looked very muscular, healthy and seemed to control the crocodile but no one knew what would happen if it broke out or there were other crocodiles in the water.

An adventurous game that gives off a very strong feeling but can be life-threatening.

Labor protection has 1-0-2, this insurance wire will become death wire if an incident occurs.

The bearer always thought he could control everything so often subjective but with this situation it was impossible to "save".

If that piece of ice suddenly falls, the terrible consequences will occur.

Men are stronger than women so they tend to lead to subjectivity.

With this type of protection, there is no such thing.

This one must say playfully, what if the guy stumbled or jumped off the pool?

Knowing is dangerous but they still do things like this.

Be smart or stupid!
