

Air conditioner with good brands Omron, Dotha or Philips?

The nasopharyngeal device supports effective treatment of respiratory diseases such as sore throat, rhinitis, sinusitis should choose which quality in 3 brands Omron, Dotha, Philips?

In this article, TipsMake.com will compare 3 popular Omron, Dotha and Philips nasopharyngeal brands in the market today so that you can choose the right product for yourself!

The erratic weather changes always make people worry about the risk of sore throat, rhinitis, bronchitis, inflammation, pneumonia, asthma, especially in the elderly and children. The introduction of a nebulizer helps to effectively treat respiratory diseases without affecting the digestive system and the patient's health as other conventional medicine treatments.

Among the numerous nasopharyngeal models on sale today, the Omron aerosol, Dotha aerosol and Philips aerosol are names that are trusted by many consumers. Let's see which of these 3 brands is a good choice!

Comparison of air-nebulizer machine Omron, Philips, Dotha

1. Trademark
2. Price
3. Quality
4. Design

Trademark

When choosing to buy a product, especially a health care device, the brand of the manufacturer is always on top. Popular products are more preferred when undergoing long-term testing.

In terms of brand, Omron and Philips are somewhat better. Omron is a brand from Japan, established over 85 years and very famous for medical equipment products such as nasal nasal aspirator, electronic thermometer, blood pressure meter .

Omron NE-C801 nasal aspirator comes from Japan.

Philips is also a reputable brand from the Netherlands with over 100 years of experience. However, for ordinary users, Philips is often better known for consumer electronic devices such as blender, irons .

Dotha is less well known because this brand was born in 2009 only.

Price

Price is always one of the factors determining whether you buy a product or not.

The products of these 3 firms are quite similar in price. From just over 600,000 dong a little, you can own a nebulizer.

However, when there is the same price, the products of brands from Japan will be the most popular. The reason is because products from the land of cherry blossoms are always famous for their durability. So Omron aerosol has always been at the top of the best-selling health care products today.

Philips nasal nasal aspirator conveniently used at home.

Quality

Once you have chosen a brand and considered the amount of money you can spend on a product, the next important thing you cannot ignore is product quality.

Currently, all ingredients in Omron and Dotha's products do not contain chemicals in accordance with the European Union's 'Restriction on the Use of Hazardous RoHs'. And Philips, a reputable brand from Europe, is definitely a good quality guarantee.

However, through the evaluation of many users, Omron aerosol has the smallest fine particle size. This is a very important factor because when the drug is taken in a smaller, smooth form, it is easier to crept into the alveoli of the lungs, making treatment faster and more effective.

Considering 3 products with relatively similar prices of these 3 brands are Omron NE-C801 nasal aspirator, Philips Essence nasal aspirator and Dotha Health Care 2 in 1 nasal aspirator - Nebulizer, Omron has size Particle size is only 3 micrometers, Philips ensures 77% of particles are less than 5 micrometers in size and Dotha has the largest particle size up to 8 micrometers.

Dotha Health Care Nasal aspirator 2 in 1 Nebulizer is capable of nasal spray and suction nasal fluid.

Design

Products of aerosol machines from all three brands are compact, simple and convenient in the process of using, storing and cleaning.

The products are also very convenient to take away, travel . so you are assured of respiratory health for your whole family.

Hopefully, the above information will be useful for you in the process of selecting air nose and throat products to no longer worry about sore throat, rhinitis, sinusitis . for your whole family in tropical monsoon weather. Hot and humid of Vietnam.
