

Alibaba and the fortified Jack Ma wall made the Chinese hackers terrified

To deal with dangerous hackers, Jack Ma decided to recruit all those who attacked Alibaba's network to the company to work for themselves.

Being attacked by hackers is probably a terror to most people, especially companies and businesses. But in contrast to Alibaba, it is nothing to worry about, why? Because Jack Ma has a handful of talented people that can make hackers terrified before deciding to attack Alibaba.

Alibaba Group was founded in 1999 and has since become the largest e-commerce group in China. Not only is famous for the e-commerce field, but Alibaba is also known by Chinese technology as a wall of impenetrable fortunes that hackers must be terrified. To create such a reputation, do you know what Jack Ma did to make this e-commerce group able to cope with all the famous Hacker in China?

Terrifying hackers do not mean that Alibaba has not been attacked by the network, but most hackers have to pay a heavy price for their actions after the attack. Over the years, Alibaba's cyber-attacks have been developed very comprehensively and reached a high level, which makes hackers think of it.

Ali Shen - The powerful cyber security agency

To create a powerful and smooth operation without any network security problems like today, Alibaba Group has excellent, excellent people in Alibaba's network security team - "Ali Shen Yun "(The shield of Ali) silently works day and night to help Jack Ma protect and develop Alibaba.

Ali Than Thuan team was established in 2005, this is considered the most mysterious part of Alibaba Group. Ali Shen Thuan's mission scope is very wide, covering the following areas: copyright protection, account safety protection, mainly preventing virtual account registration, protecting transaction safety, preventing fraud translate, remove malicious comments, ensure information security, protect privacy and prevent information leakage, ensure digital safety, control Big Data .

Ali Shen Yin is divided into 02 parts including Analysis Team and Action Team. In it, the Analysis Team is in charge of dealing with daily security reports, gray matter industry research, Action Team in charge of handling threats related to network security, solving account problems , transactions, information . Not only encapsulated in Alibaba Group, Ali Than Thuan also cooperates with units of the Ministry of Public Security of China on electronic warfare, making forces and powers more powerful. ever.

Ali team is resounding with talented commanders

In order to develop the team of Ali Than Thuan, Jack Ma has recruited 4 talents, who are considered the main pillars of Ali Than Thuan: Tieu Luc - expert of cybersecurity research, Phan Ai Dan - technical expert Social network and Liu Wei - technology engineer and finally Wu Wei Qing - white hat hacker, cyber security expert.

Among these four, the engineer born in 1985 Ngo Quyen Thanh, was respected by Chinese hackers and nicknamed Tieu Hac. At the age of 16, Xiao He was one of the most famous white-hat hackers, so much so that Chinese netizens always conveyed a phrase: "Xiaoyi wants to hack anyone's house and sleeps tonight." At the age of 21, Tieu Hac successfully hacked Alibaba internal network from the interview room, immediately Ngo Quy Thanh was selected by Jack Ma and became one of the trump card for the company.

Their main job in Alibaba Group is to lead their team, ensure that Alibaba's operation system is smooth, not stagnant when there are several hundred million people visiting at the same time every day. In addition, they check and repair the vulnerabilities every day, hackers attack the Group's intranet. Xiaotong, Wu Deng Qing and colleagues built the "Alibaba Firewall" very firmly, DDos attack prevention system, and a variety of other security systems . can now say no one company, Which group has a strong network security system like Alibaba.

Because network security is also very much related to the law, Alibaba also recruited more than 20 other experts who worked in the judicial, legal, police . system of China. They provide an enormous amount of knowledge,

flexibility in handling any legal issues of Alibaba.

Abundant financial resources

With a total assets of up to 37.4 billion USD, Jack Ma is considered the richest person in China and ranked 18th in the world according to Forbes magazine in August 2017. Alibaba Group is also one of the largest corporations in China, each of Alibaba's fluctuations has a significant impact on national finance. Therefore, Alibaba has a close relationship with government agencies, especially the Ministry of Public Security is understandable. For those who accidentally mistakenly mistaken Alibaba will be difficult to escape the labor circle, the risk of facing high projects compared to other organizations. Therefore, hackers often whisper that attacks on Alibaba are ineffective.

With its plentiful financial resources, Alibaba does not regret collecting and acquiring technology companies and information security companies not only in China but also worldwide. In 2015, Alibaba surprised many people when buying the Korean security company, Hai Nguyen, and then realized that with the joining of Han Hai Nguyen, Alibaba naturally got tons of prevention technology. APT, helped Alibaba's network security system be raised to new heights.

Not only that, strong financial resources help Alibaba attract many talents to their side with extremely attractive salary. Specifically payroll of network security experts at Alibaba has been revealed sky-high.

The salary of technical experts is 400,000 - 600,000 yuan / year (1.3 billion - 2 billion VND), they are entitled to receive 1,000 shares and full use right after 4 years. The salary of senior experts is VND 600,000 - 1,000,000 / year (VND 2 billion - VND 3.4 billion) with 2,000 shares and full rights to use after 4 years. Long-term experts have higher salaries, from 1 million to 1.2 million yuan / year (3.4 billion - 4.1 billion VND). Employees in this position also have the right to negotiate the number of shares they want to receive.

Good relationship with government and other individual organizations

In fact, Alibaba has many times been attacked by hackers, in particular: December 20-21, 2014, a game company using Alibaba's Yundun system suffered DDoS attacks, causing the system to be delayed for 14 hours continuously. . In June 2015, hackers attacked, took 99 million Taobao account information, of which more than 20 million accounts had regular transactions and enhanced use of security . But, thanks to force and relationship My wide Jack Ma has secured most of that information, avoiding leaking outside affecting the Group.

Thus, it can be seen that in addition to the excellent staff and good relationship with the government of Jack Ma, he helped Alibaba achieve many great achievements and prevent the threat from hackers.
