

Alienware M11x to core i3, i5 and i7 next month

M11x will be more powerful with Intel Core i series processors instead of low-voltage Core 2 Duo chips.

M11x will be more powerful with Intel Core i series processors instead of low-voltage Core 2 Duo chips.

Although rated as a revolutionary gaming laptop with compact size and pleasant price, the Alienware M11x still makes few gamers feel dissatisfied with the processor that it owns. The Core 2 Duo low-voltage chip has no significant power, the power saving advantage is also not evident on the M11x model.

Yesterday, Mr. Pearce Clune, head of consumer markets in Africa, the Middle East and Turkey, satisfied Alienware's fans with the official confirmation that the M11x version will soon be lifted. issued with Intel Core processor i3, i5 or i7 next month.

In particular, the integrated version of Intel Core i7 processor will appear as one of the models with the most powerful 11-inch screen on the market.
