While exploring the hidden corners of Roblox Abyss, you may have come across many hidden structures and locations. Among them, you might find hidden treasure chests, some even locked behind bars. These are fish-shaped ruins that can only be opened with a key you receive upon completing quests.

Location of the Fish Ruins in Roblox Abyss

There are currently a total of 7 fish remains in the Abyss, scattered across three main areas. Below are images marking the locations and related details:

Ocean

The first fish ruins are located atop a rock structure just behind the NPC Virelia. So, right after completing the tutorial, redeem the Abyss code and search for this shrine.

The second fish remains are located midway between the Scientist NPC and the Lost Captain NPC at the bottom of the ocean. Note that this location is at a depth of over 200m, so you will need to use the Tube.

Ancient desert

In the Ancient Desert, you can find the first fish remains atop a stone tower just behind the NPC Suspicious Fisher.

Here, you can find the second fish-shaped ruins located on a rock structure right next to Gumpy Hank Tower.

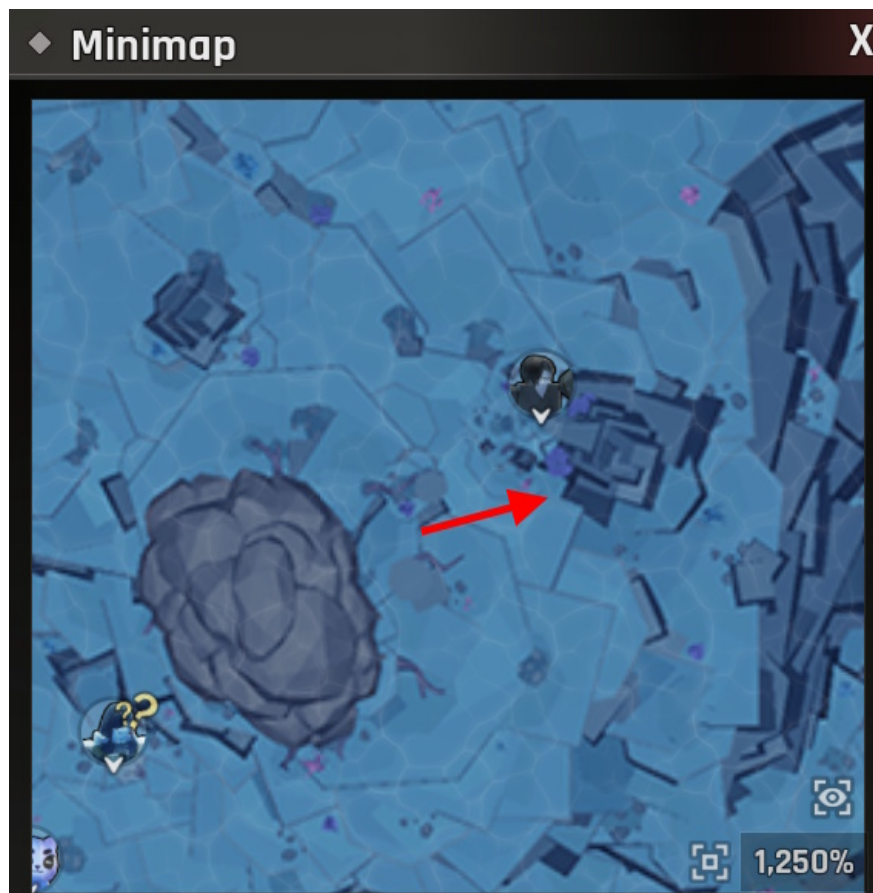

spirit Roots

The first fish remains in Spirit Roots are located directly in front of NPC Isaac, atop the safe dome.

You can find the second item inside the tunnel beneath NPC Isaac. You can see its location on the map; it's right below the treasure chest near Isaac.

The third fish relic can be found inside the Spirit Root cave east of the NPC Golem, just before the entrance to the NPC King Cat.
