

Already able to customize Colors and Themes in Chrome Canary

Custom Colors and Themes available in Chrome Canary have been mentioned for a long time by developers and users.

Chrome Canary's Custom Colors and Themes are available for a long time by developers and users, but until now, Chrome's New Customize Tab Menu has finally arrived. Works with the ability to change colors and themes for this browser.

This customization is only available in Chrome's latest Canary Build (77.0.3826.0), which enables users to display the new Custom Menu and make their device and browser a bit more eye-catching.

You can try this feature by downloading Chrome Canary here.
