

Already able to stream music with Spotify application right on Google Maps, invite you to experience

From today, October 4, users (both iOS and Android) can listen to music from the Spotify application right away while using Google Maps.

From today, October 4, users (both iOS and Android) can listen to music from the Spotify application right away while using Google Maps. This means that users will not have to switch back and forth between the music and navigation interface when they are in traffic as before.

This is the result of a collaboration between Spotify and Google Maps to limit inconveniences as more and more users are moving on busy roads and streets while streaming music with Spotify.

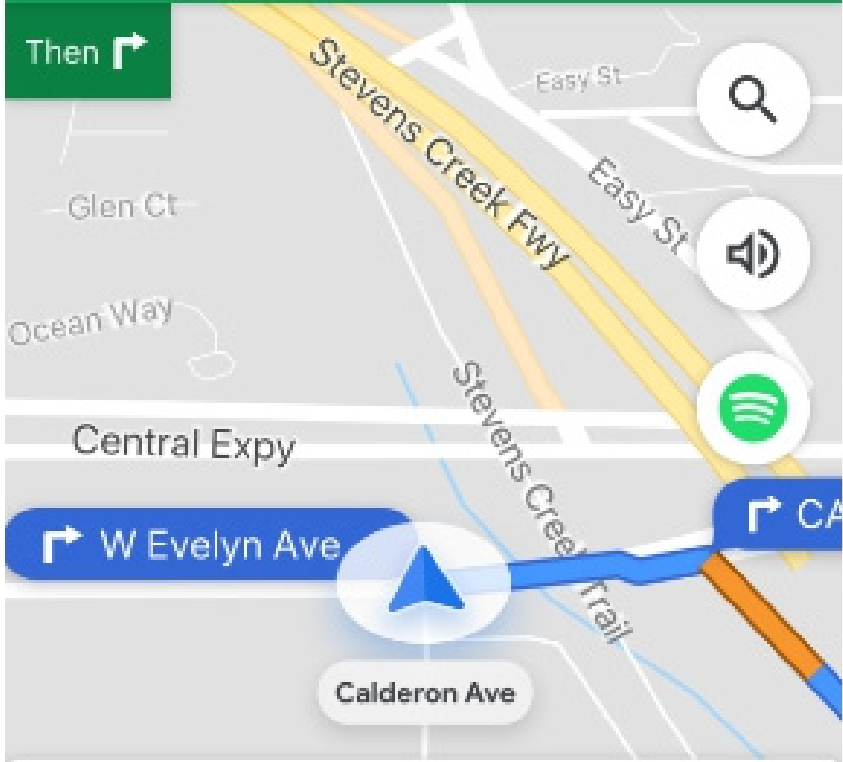

Accordingly, users after connecting to Spotify account can make adjustments to the Music Play (Play), Pause or Skip (Skip) modes right on the Google Maps navigation system Enjoy music from Spotify during the move.
