

Already have Windows 10 Caculator version on Android and iOS, download and experience

Microsoft has partnered with Uno Platform to release a Windows 10 Calculator version for mobile devices, both on Android and iOS platforms.

Windows 10 Calculator is a free calculator app for PC. In March, Microsoft opened the Windows 10 Calculator application source on Github to anyone who wants to download and compile it so that developers can contribute more features. And now, Microsoft has partnered with Uno Platform to release a Windows 10 Calculator version for mobile devices, both on Android and iOS platforms.

Windows 10 Calculator has a simple, user-friendly interface. In addition, it also supports light theme and dark mode.

Not only is it a full-featured application, Windows 10 Calculator can also perform other tasks such as math, function graphing, programming, bill calculation, and measurement conversion.
