

Alt + Tab delay and 5+ quick and easy ways to fix it

Alt + Tab delay makes you 'frustrated' because you can't switch between running software quickly?

Alt + Tab delay makes you 'frustrated' because you can't switch between running software quickly? Refer to the simple, effective solution revealed in detail by TipsMake in the article below!

For many people, especially gamers, the shortcut key combination Alt + Tab is used very often to quickly switch between active programs on the computer. Therefore, when **Alt + Tab is delayed**, the user experience will immediately be affected. Many people are even "frustrated" because when they press Alt + Tab, it takes 10 to 15 seconds to return to their game. To overcome this situation, quickly apply the tips **detailed** by TipsMake in the next section .

Pocket 5+ effective ways to fix Alt + Tab delay

There are quite a few 'culprits' causing Alt and Tab slowness. Outdated graphics driver, keyboard driver not updated. Or the programs you're trying to convert don't support it. Also, it could be because you are running the game in full screen mode. Besides, some people also encounter the problem of Alt + Tab lagging after updating to a new version of Windows 10. Here is a specific solution.

Explain and fix the problem of Alt + Tab delay when playing games

Slow Alt + Tab is a situation that many gamers encounter while playing games in full screen mode. Specifically, when in this mode, the game has full access to the graphics card.

Therefore, Windows will not render the Desktop screen in the background to save hardware resources. This is why other open applications will be in pause mode and the Windows mouse will also be locked. Therefore, when Alt + Tab, the system does not just switch to another window. It also has to minimize the game > redisplay the Desktop screen and applications at the window level that the gamer has opened. Then, when returning to the game, the game will have to regain full control of the device's hardware. With such a complicated process, Alt + Tab lag, slowness, game lag, unrecoverable. can easily happen.

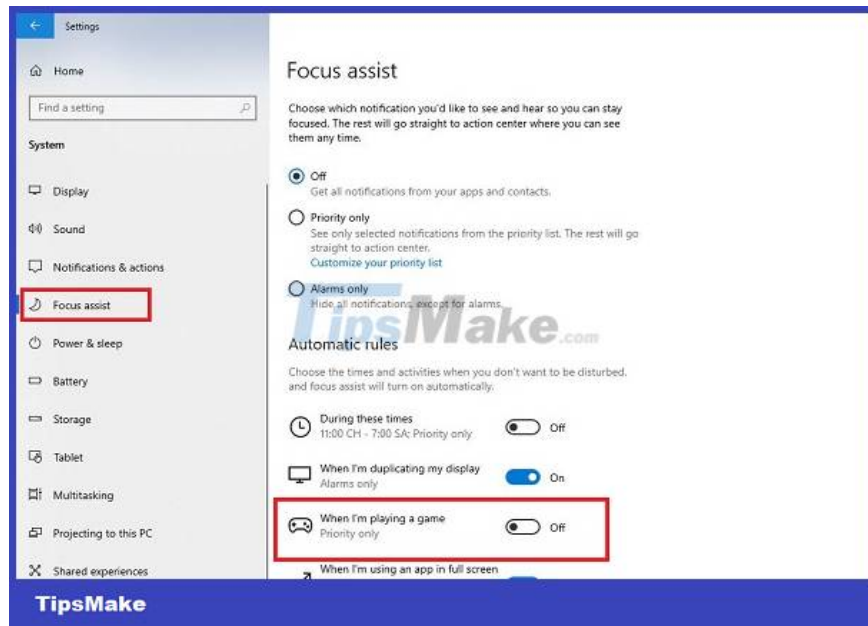

How to fix

1. *Turn off unnecessary software during gaming*
2. *Play the game in Windowed Mode or Borderless Windowed Mode if you must run other software during gameplay.*

Disable Focus assist mode when playing games

Many tech friends also shared that the way to fix when Alt + Tab is slow is to turn off Focus assist mode when playing games as follows:

1. **Step 1** : Press **the Windows + I** key combination to open Settings > Then, click on **System** .
2. **Step 2** : Continue, click on **Focus assist** in the list on the left.
3. **Step 3** : Find the line **When I'm playing a game** > Turn the switch of this line to **OFF**.

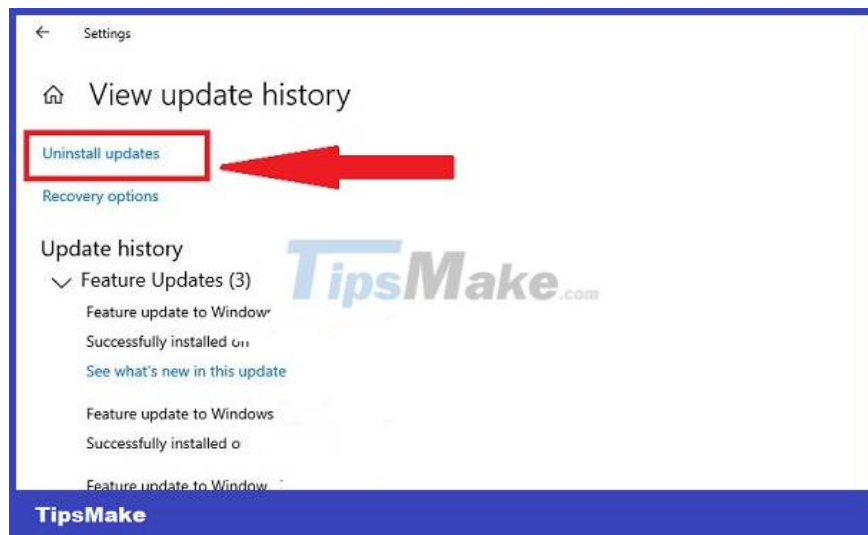

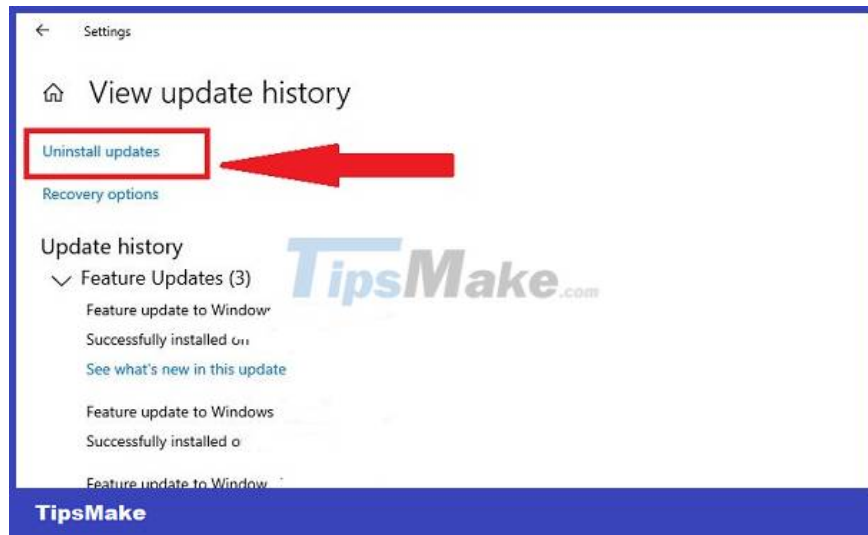

In addition, some brothers also shared that you should **turn off the remaining items** and the problem will be fixed.

Uninstall the latest update for Windows

First, you need to check and update Windows to the latest version (if available). Because new versions will help fix existing errors in the old version and the problem of Alt + Tab being delayed after updating will also be resolved. But if there is no update or this doesn't fix it. Try uninstalling the latest Windows update as follows:

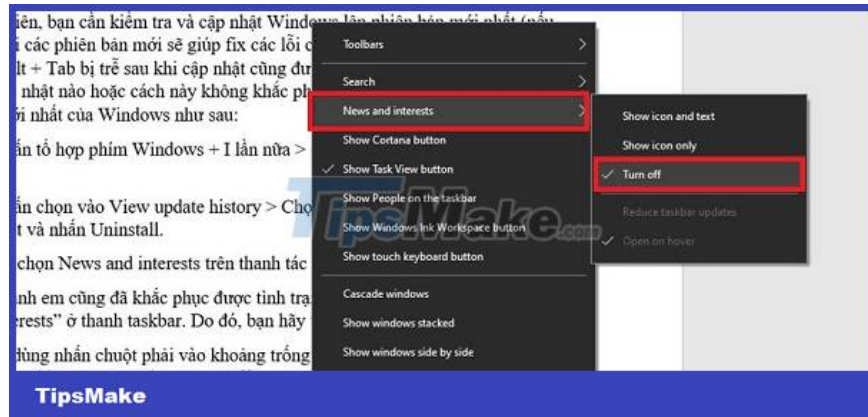

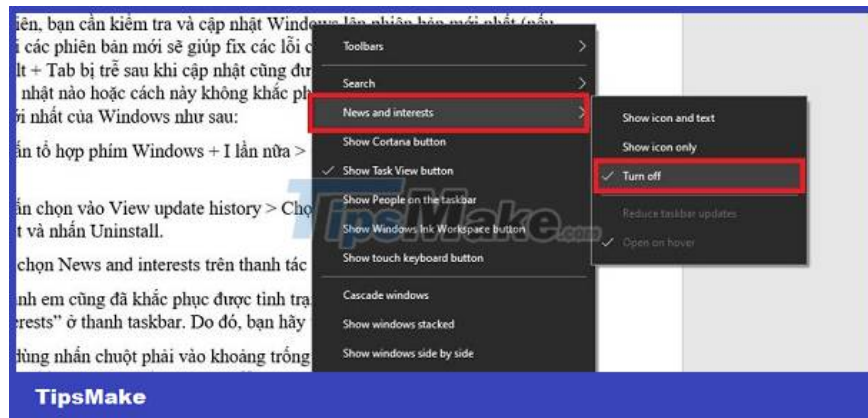

1. **Step 1** : Press the **Windows + I** key combination again > Select **Windows Update** in the left menu.
2. **Step 2** : Click on **View update history** > Select **Uninstall updates** > Identify the update and click **Uninstall**

Turn off the News and interests option on the taskbar

Many people have also overcome the problem of Alt + Tab being delayed when turning off 'News and interests' in the taskbar. Therefore, please try this method and see how it works!

The user right-clicks on an empty space on the Taskbar > Click 'News and interests' > Select **Turn Off**.

A few other remedies when Alt + Tab is slow

1. *Update graphics driver*
2. *Update keyboard driver*
3. *Power off and restart your PC*
4. *Turn off all running programs and restart the game again*
