

Amazingly, the whole herd of buffaloes returned to save the same kind from hungry lions

The shrewd lions use a design to isolate the buffalo buffalo, who attack to distract the buffalo in the direction of the buffalo. A bunch of lions seemed to have had a full meal when the unexpected happened.

The shrewd lion used to design the mother and the buffalo, "the" attack to distract the buffalo, "the" then enlisted to bite the child. A bunch of lions seemed to have had a full meal when the unexpected happened.

African wild buffalo is one of Africa's most terrifying animals, they can weigh up to 1,540 pounds (700kg). They possess 40cm long horns and have the power to kill lions and wounds caused by wild buffalo.

African wild buffalo with horns with horns endangers anyone who eats

In addition, African wild buffalo usually not only appear alone, they follow a very aggressive large herd. Therefore, even lions do not dare to attack this huge and extremely dangerous prey.

On the vast prairies of Northwest Tanzania, East Africa, lions have discovered wild buffalo that are grazing. The attack on buffaloes is too dangerous, but with the stomach hungry, three lions force them to "plan". Very quickly 3 lions identified the target of attack, the mother of the buffalo.

First, the three lions pretended to chase and the entire buffalo fled away, then cheated and isolated the mother and son buffalo from the herd. Then, they used the hunting strategy to separate the baby from the mother buffalo to easily feed the prey: 2 lions attacked the mother buffalo to disperse its attention so that the rest of the lion easily attacked. baby

In that extremely dangerous moment, the miraculous thing happened, the whole herd of buffaloes returned to save the buffalo mother. The situation was reversed, the predators became prey, the buffalo buffalo rushed to attack the three lions, causing them to flee quickly.

The lions used clever hunting tactics to separate the pair of mother and son from the herd, but unfortunately, the terrible solidarity of the wild buffalo has made them not only do not hunt the prey but also have to flee. .
