

# AMD hardware Gaming laptops - not just perfect gaming machines at an extremely affordable price

In recent years, with music, movies, sports ... Gaming is gradually becoming a form of entertainment that many people choose, especially when the game is one of the industries that benefit most thanks to The continuous development of technology.

Dozens, hundreds of top-notch games are released by developers every year, resulting in the continuous improvement of high-configuration laptop and gaming laptop products to serve the maximum need to experience the virtual world. gamers' brothers.

**Enjoy the game world in your own way**

Acer Nitro 5 AN515-43-R84R - Powerful gaming laptop at an affordable price.

10, 20 years before mentioning laptops, people often only think of a mobile device to serve for office work, normal study with adequate hardware configuration, though gaming laptop models appear but Very limited in terms of design and often cost beyond the threshold of spending on a technology product. But things changed gradually, as the explosion of technology companies like AMD, leading to more and more accessible hardware components, gaming laptops using Ryzen chips and Radeon graphics cards appeared. like trying to break the stereotype that "gaming laptops are priced too high, not suitable for the majority of users".

And this is the time when gaming laptops with a variety of models, suitable for diverse needs on the throne and gradually assert themselves. From laptops priced at just under 20 million VND such as: HP Pavilion Gaming 15

ec0050AX, Acer Nitro 5 AN515-43-R84R . using Ryzen 5 3550H processor to bring powerful performance level to experience in a way. authentic popular games like PUBG, League of Legends or triple A blockbusters on the market. Moreover, the Ryzen 5 3550H laptops are designed to be light and thin, optimized for travel to meet the needs of gaming anytime, anywhere and expand rather than serving the needs of learning and working. daily work.

The thin, streamlined design of the HP Pavilion Gaming 15 ec0050AX makes it easy to carry around

### **Upgrade friends - explode game quality with Radeon RX 5500M**

Not only providing quality, affordable gaming laptops, AMD-based gaming laptops really take the lead in elevating your gaming experience in cooperation with MSI, giving birth to MSI Alpha 15 - one of the pioneering laptops to use the Radeon RX 5500M - the world's first 7nm-process mobile graphics card.

MSI has marked this step by giving MSI a new logo, no longer a stylized red dragon image but a strong, green phoenix that goes against MSI's traditions, makes MSI Alpha 15 different and worthy of being worthy of the Radeon RX 5500M - an important milestone in the development of the mobile technology industry.

Using Radeon RX 5500M - the first 7nm VGA for mobile devices, MSI Alpha 15 has really made an impressive difference.

Radeon RX 5500M has said goodbye to the old 14nm and 10nm processes to go straight to the 7nm process, making the prerequisites when choosing a gaming laptop model: performance, temperature, power consumption . have been improved, helping launch the games that require high graphics configuration like Red Dead Redemption, RE 3, Tom Clancy's Ghost Recon: Breakpoint . become smoother and stable so you can really immerse in The game world is in the most realistic way.

In particular, not only is a reliable comrade in the explosive games, from February 4, 2020 to April 25, 2020 laptop products using Radeon RX 5500M graphics card are also receiving chapters. Hot promotions: Two Resident Evil 3 titles, Tom Clancy's Ghost Recon: Breakpoint. So are you ready to overcome the bunch of zombies in the Resident Evil 3 remake version or the extreme gun battle scenes in Tom Clancy's Ghost Recon: Breakpoint on a top-notch gaming laptop configuration?
