

Among Us will support Xbox in 2021, coming with a new map of Airship

Among Us is on its way to Xbox One platforms as well as Xbox Series X / S in 2021. At the same time, this cult game will officially appear on the Xbox Game Pass gaming service platform for the console of Microsoft.

The news was made on Microsoft's 'official' Twitter, at the same time this popular mafia-style game officially joined the Xbox Game Pass service pack for PC - and just days after it came out. released on the Nintendo Switch on December 15.

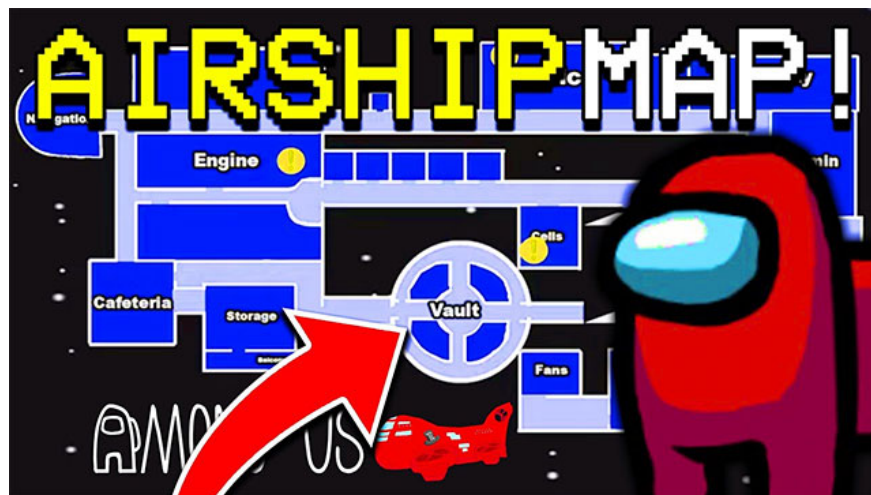

This is definitely a news that the fans of Among Us have been waiting for a long time. Playing games on mobile platforms or PC is of course no problem, but obviously the console platform will also bring the game new and exciting experiences in its own style. This hit game is actually a project that has been released since 2018. But until recently it has really become widely known around the world due to the way its gameplay can connect people. during social quarantine episodes by the COVID-19 pandemic.

In the game, players will play the role of a member of a crew on a spaceship with the other members. On this ship, there will be one or more players playing the role of impostors as members of the crew. This impostor will sabotage the ship and kill all other players.

Your mission and the other real astronauts will be to find the impostor before he can reach out to everyone and destroy the ship. Once someone dies, all members will gather and vote to kick the impostor off the ship.

In a related news, developer InnerSloth recently announced that it will release a new map for Among Us early next year called The Airship, with many interesting innovations.

With a simple but attractive storyline and unique gameplay, Among Us has been, and will be, the world of entertainment, familiar interaction of millions of people around the world.
