

Anti-dust laptop screen

Annoyed by the dust, lem and fingerprints printed on your laptop screen? It can be claimed by LG.Philips LCD about new dust-proof, easy-to-clean laptop screens that will interest you.

Annoyed by the dust, lem and fingerprints printed on your laptop screen? It can be claimed by LG.Philips LCD about new dust-proof, easy-to-clean laptop screens that will interest you.

A special coating on the outside of the screen not only protects against glare, but also has excellent anti-fouling and grease properties, the company's representative said.

Instead of installing two parallel casing, an anti-glare layer, a separate dust-proof layer like many of the current technologies, LG.Philips decided to integrate the two layers into one.

" Why is it costly and time-consuming, when a single" shirt "class can handle both parts? "

" Our new type of screen applies the same formula as when making non-stick pans ," said Ahn Byung-chul, head of the company's technology development team. " Grease and dirt can now be cleaned easily ."

Like non-stick pan?

Even, according to the advertising of the company, the new shell also allows to erase the ink smudge.

As expected, the new technology will begin mass production in the first half of 2008. The first landing is a 15.4-inch widescreen monitor, which will be followed by all other screen sizes at the end. next year.

Goodmorning Shinhan Securities analyst John Soh predicts that the technology will attract students, because the customer class often uses pens next to the laptop.

LG.Philips is currently the world's second largest manufacturer of liquid crystal displays and the winner of screen manufacturing for laptops. Its main rival is Samsung Electronics, also a giant from Korea.
