

AnTuTu announces the top 10 Android smartphones with the highest benchmark scores in March 2020

A special thing is that all 10 smartphones in the March ranking of AnTuTu use Qualcomm's latest high-end Snapdragon 865 processor.

As usual, AnTuTu recently released a list of 10 Android smartphones with the highest performance scores in China in March 2020. For each device, AnTuTu performs at least 1,000 tests to give the final result, in which the time for data collection starts from 1/3 and ends on March 31.

OPPO Find X2 Pro

In the ranking of Android smartphones with the highest performance score of AnTuTu in March, OPPO Find X2 Pro took the first place with an incredible score of 606,389 points. This figure is quite different from Mi 10 Pro, which is ranked in second place with AnTuTu score of 598,572 points.

OPPO Find X2 occupies the third position with 590,253 points, while Redmi K30 Pro is in fourth place with 589,607 points. The fifth and sixth positions belong to iQOO 3 and Black Shark 3 Pro, with AnTuTu scores of 588,305 and 588,125 points respectively.

7	realme X50 Pro 5G	Snapdragon 865	8GB+128GB	588055
8	NEX 3S 5G	Snapdragon 865	12GB+256GB	586577
9	小米10	Snapdragon 865	12GB+256GB	579550
10	腾讯黑鲨游戏手机3	Snapdragon 865	8GB+128GB	570723

Ranking of 10 Android smartphones with the best performance in March 2020 of AnTuTu.

The seventh place belongs to a newly launched Realme smartphone, the Realme X50 Pro 5G, with an AnTuTu average score of 588,055 points. Vivo NEX 3S 5G achieved 586,577 points and ranked in 8th place, while 9th place was the presence of Mi 10 with 579,550 points. Black Shark 3 scored 570,723 points and was the last name to appear in AnTuTu's March ranking.

Notably, all 10 smartphones with the worst performance scores in March 2020 were equipped with Qualcomm's most advanced Snapdragon 865 processor, without any Kirin 990 chip. Huawei or Exynos 990 from Samsung.
