

Apple postponed the replacement of the new iPhone battery for \$ 29 for failing to meet demand

Due to the sudden increase in battery replacement demand and unsold battery capacity, customers using non-aging iPhone models will have to wait until early Q2 / 2018 to replace the new battery. as required.

After admitting to deliberately reducing iPhone performance, Apple had a new battery replacement discount program of only \$ 29 for some iPhone models. But due to the sudden increase in battery replacement demand and unsold battery capacity, customers using "not-so-old" iPhone models will have to wait until early Q2 / 2018 to be replaced. New battery life required.

The MacRumors site revealed an internal Apple document that the company will postpone a new battery replacement plan for older iPhones in the US market and some other market areas around the world until the end of March or early April 2018.

The iPhone 6 and iPhone 6s Plus series are the devices that will have to wait the longest. Meanwhile the battery replaces other models like iPhone 6s, iPhone SE, iPhone 7, and iPhone 7 Plus will be more available but also depending on the specific region.

New iPhone battery replacement program from \$ 79 to \$ 29 will last until the end of 2018. So, you can wait until Apple's battery supply becomes more stable. . If your iPhone battery is in an emergency, it needs to be replaced immediately, please contact Apple Vietnam switchboard: 18001127 for advice and appointment for replacement.
