

Apple reduced the price of USB-C cables to Lightning to \$ 19

Apple has reduced the price of the USB-C cable to Lightning \$ 6, from \$ 25 to just \$ 19.

Apple has reduced the price of the USB-C cable to Lightning \$ 6, from \$ 25 to just \$ 19. This action was made by Apple amid rumors that this year's iPhone will have USB-C charging cables to Lightning in the box, transferred from the old USB-A charger. Currently charging USB-A to Lightning costs only \$ 19. The 9to5Mac also reported that Apple will release a new 18W USB-C Power Adapter, next to the existing Adapter 29W.

iPhone USB-C charging cable for Lightning

In response to negative feedback from the earlier MacBook-C port, Apple also reduced the price of USB-C cables to Lightning and other USB-C dongles. If their best laptops use only USB-C, it is understandable when the iPhone follows this trend. USB-C cables are mandatory for those who want to use the iPhone's fast charging feature.
