

# Apple released a spare battery charger for iPhone XS, XS Max and XR, priced at 129 USD

Apple has just introduced a new Smart Battery Case - a new backup battery case for iPhone models in 2018, including iPhone XS, XS Max and XR.

Apple has just introduced a new Smart Battery Case - a new backup battery case for iPhone models in 2018, including iPhone XS, XS Max and XR. Users can also start ordering this product from today on the Apple Store website.

## 1. Apple is about to integrate standard RCS messages into iOS?

These new spare-cum-charger models are available at a price of \$ 129, regardless of whether you use iPhone XS, XS Max or XR - something quite rare in Apple's sales policy. Speaking a little bit about looks, the product has a design similar to those of the spare charger and bumper that Apple released on the iPhone 7, with the raised back of the battery housing, but overall maybe a little slimmer. Even so, this case is still relatively thick and seems to be very inconvenient because it makes it impossible to fit your iPhone into your pocket. You should also note that the iPhone X will not be able to use the iPhone XS case, although the two devices are nearly the same size. The product is currently sold with 2 color options, black and white.

Apple calls these new case panels Smart Battery Case because the battery charging process will switch to the iPhone battery indicator, so that users can know how much energy they have left, avoid unnecessary redundancies. In addition, it also has Qi's fast charging and wireless charging support features, and of course users can also use any other Lightning connectivity accessories to be compatible with smart cases. this.

## 1. Will Apple produce 'smart clothes' in the near future?

The Apple representative said the battery life provided by Smart Battery Case will depend on which iPhone is designed for the case. Specifically, the battery life for each case is announced by the manufacturer as follows:

1. Smart Battery Case of iPhone Xs will increase 33 hours of talk time, 21 hours of using internet connection or 25 hours of continuous video playback.
2. Smart Battery Case of iPhone Xs Max will provide this device 37 hours of calling, 20 hours of using internet connection or 25 hours of continuous video playback.
3. Smart Battery Case of iPhone XR will help add 39 hours of phone chat, 22 hours of web surfing or 27 hours of video playback.

Just like the back-up cum-charger models were first introduced by Apple to iPhone 7, these new models will be able to take advantage of first-party advantages when directly integrated with iOS, allowing people to Check the charging of both the back and the battery inside their iPhone in the Notification Center, similar to how to connect and manage pairing between iPhones with AirPods and Apple Watch.
