

Apple released iOS 14.1: New bug fixes

iOS 14.1 version will be pre-installed on the iPhone 12 and 12 Pro duo right after going on sale this Friday.

After many days of testing, fixing the problems users are facing from the previous version, improving to enhance the performance, adding some new features.

Apple has officially released a new version of **iOS 14.1** for iPhone, iPad and iPod touch users. This version was launched by Apple just before the iPhone 12 and iPhone 12 Pro hit shelves on October 23.

According to Apple, the new version of iOS 14.1 fixes a lot of backlog problems, including serious errors such as sending the wrong email address in the Mail app, fixing widget and app icons not the same size, fixing app errors. The computer cannot display the number 0 .
