

Apple released security updates for OS X users

Besides the release of iOS 7.1.1, today Apple also released a security update (Security Update 2014–002) for Mac users.

Besides the release of iOS 7.1.1, today Apple also released a security update (Security Update 2014–002) for Mac users.

This update is compatible with OS X Mavericks, Mountain Lion, and Lion versions, and Snow Leopard users continue to be "abandoned".

Software Update
Restart Required

Security Update 2014–002 1.0

Security Update 2014–002 is recommended for all users and improves the security of OS X. This update also includes Safari 7.0.3.

For information on the security content of this update, please visit this website: <http://support.apple.com/kb/HT1222>. For information on the content of Safari 7.0.3, please visit this website: <http://support.apple.com/kb/HT6195>.

Apple said it has patched a number of security flaws in its update, details posted on the support page. The company encourages all users to download the update. Users can update via Software Update in Mac App Store or download at the link below:

- Security Update 2014–002 (Mavericks) (80.5 MB)
- Security Update 2014–002 (Mountain Lion) (135.9 MB)
- Security Update 2014–002 (Lion) (126.9 MB)
- Security Update 2014–002 Server (Lion) (177.2 MB)
